Mother's Memory Jean Meikle, 2016-02-24 My choice to keep my son at home during his illness seemed like the only option due to my son's aversion to staying in a hospital. It was a hard decision with lasting consequences. The choices were either hospital or home, as hospices were not offered as an option at that time. This is his story, my memories. [The Year of Finding Memory](#) Judy Fong Bates, 2011-03-29 In the tradition of *The Concubine's Children* and *Paper Shadows*, a probing memoir from the author of the acclaimed novel *Midnight at the Dragon Cafe*. An elegant and surprising book about a Chinese family's difficult arrival in Canada and a daughter's search to understand remarkable and terrible truths about her parents' past lives. Growing up in her father's hand laundry in small town Ontario, Judy Fong Bates listened to stories of her parents' past lives in China, a place far removed from their every day life of poverty and misery. But in spite of the allure of these stories, Fong Bates longed to be a Canadian girl. Fifty years later, she finally followed her curiosity back to her ancestral home in China for a reunion that spiralled into a series of unanticipated discoveries. Opening with a shock as moving as the one that powers *The Glass Castle*, *The Year of Finding Memory* explores a particular yet universal world of family secrets, love, loss, courage, and shame. This is a memoir of a daughter's emotional journey and her painful acceptance of conflicting truths. In telling the story of her parents, Fong Bates is telling the story of how she came to know them, of finding memory. *Neurons, Axons, Dendrites, Synapses, and Memory: My Life* Jose Morales Dorta, 2019-07-22 This is a detailed, clear, simple, and interesting academic and intellectual trip into neuron axons, synapses, and their bases in memory formation and learning. The author goes after the origin of his first primordial memory in an attempt to find and nurture his own identity and personality. Memories can be categorized as working memory, short-term memory, and long-term memory. In addition, we have conscious, unconscious, toxic, automatic, and uncategorized memory, such as adoptive memory in the immune system, puzzling but challenging memory during matching nucleotides and amino acids. T cells' memory recognizes, identifies, and destroys pathogens among billions of cells, genes, and proteins, packaging for self-protection and function. Long-term unconscious memory is just

the tip of the iceberg when it comes to cognitive memory Further exploring his initial objective the primordial memory the author encounters the electrical and chemical reactions coming under the domain of genes without ignoring DNA Last but not least is memory of love from birth till death It is encoded in a memory that encompasses my whole body **Report**
