## **Radical Agriculture:**

*Radical Agriculture* R. Merrill, 1964      **Radical Agriculture** Richard Merrill, 1976      **Regenerating Agriculture** Jules N. Pretty, 2013-11-05 For the past 50 years the main goal of agriculture has been to increase production at any price using high amounts of fertilizers and pesticides and intensive industrial methods This has caused damage to the environment and widespread rural depopulation This study shows that there is a viable alternative a form of agriculture which conserves resources maintains rural employment and minimizes the external costs without loss of productivity Using case studies from industrialized and developing countries the author describes the new technical institutional and policy options available

**Radical Agriculture** Richard Merrill, 1976      Kropotkin Brian Morris, 2018-06-01 The nineteenth century witnessed the growth of anarchist literature which advocated a society based on voluntary cooperation without government authority Although his classical writings on mutual aid and the philosophy of anarchism are still published today Peter Kropotkin remains a neglected figure A talented geographer and a revolutionary socialist Kropotkin was one of the most important theoreticians of the anarchist movement In *Kropotkin The Politics of Community* Brian Morris reaffirms with an attitude of critical sympathy the contemporary relevance of Kropotkin as a political and moral philosopher and as a pioneering social ecologist Well researched and wide ranging this volume not only presents an important contribution to the history of anarchism both as a political tradition and as a social movement but also offers insightful reflections on contemporary debates in political theory and ecological thought After a short biographical note the book analyzes in four parts Kropotkin's writings on anarchist communism agrarian socialism and integral education modern science and evolutionary theory the French Revolution and the modern state and possessive individualism terror and war Standing as a comprehensive and engaging introduction to anarchism social ecology and the philosophy of evolutionary holism Kropotkin is written in a straightforward manner that will appeal to those interested in social anarchism and in alternatives to neoliberal doctrines

**Visions of Freedom** Morris Brian Morris, 2019-10-15 Every ten years notoriously eclectic thinker Brian Morris takes a year of sabbatical and launches out into another field about which he knows nothing In the 1980s it was botany in the 1990s zoology in the 2000s entomology The quintessential polymath Morris has written on his incredible breadth of interests in wide ranging essays with subjects ranging from boxing to deep ecology to new age gurus Collected here for the first time *Visions of Freedom* brings together all of Morris's concise yet diverse essays on politics history and ecology written since 1989 It includes book reviews letters and articles in the engaging and accessible style for which Morris is known The thinkers he deals with are as diverse as Thomas Paine to C L R James from Karl Marx to Krishnamurti from Max Weber to Naomi Klein He also delves into the canon of classic anarchist thinkers like Kropotkin Bakunin Reclus Proudhon and Flores Magnon Taking a stance against the obscurantism of contemporary academic discourse Morris's writings demonstrate an interdisciplinary approach that moves seamlessly between topics developing practical connections between scholarly debates

and the pressing social ecological and political issues of our times      **The Social Risks of Agriculture** Ronald C. Wimberley, Craig K. Harris, Joseph J. Molnar, Terry J. Tomazic, 2002-08-30 In a vast society where environmentally conscious nonfarming voters and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century      *Civic Agriculture* Thomas A. Lyson, 2012-05-22 A engaging analysis of food production in the United States emphasizing that sustainable agricultural development is important to community health      *The Oxford Handbook of Land Politics* Saturnino M. Borras, Jennifer C. Franco, Researcher Jennifer C Franco, 2025 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land      **Terrorism, Radicalism, and Populism in Agriculture** Luther G. Tweeten, 2008-06-02 While terrorism in agriculture takes few lives the misinformation emerging from the rhetoric of anti globalists radical environmentalists and animal welfare extremists costs Americans billions of dollars in lost income every year This controversial volume illuminates the political economic and global effects of these groups on the agricultural industry The clear concise and readable book discusses specific events and issues helping readers understand how radical agriculturalists think Tweeten explains how half truths and false ideologies find their way into our political systems and bring about bad public decisions increasing losses and causing global repercussions Terrorism Radicalism and Populism in Agriculture offers enlightenment for anyone involved in business agriculture policy making and politics

**Troubled Harvest** Joseph Cotter, 2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico's urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State's efforts to assist peasant farmers     We Must Begin with the Land Stephen Hunt, 2025-04-29 A polyculture of ideas decolonising reframing and transforming how we think about the things we grow through a social ecology lens

**Ecological Solidarity and the Kurdish Freedom Movement** Stephen E. Hunt, 2021-10-11 Ecological Solidarity and the Kurdish Freedom Movement Thought Practice Challenges and Opportunities is a pioneering text that examines the ideas about social ecology and communalism behind the evolving political structures in the Kurdish region The collection evaluates practical green projects including the Mesopotamian Ecology Movement Jinwar women's eco village food sovereignty in a solidarity economy environmental defenders in Iranian Kurdistan and Make Rojava Green Again Contributors also critically reflect on such contested themes as Alevi nature beliefs anti dam demonstrations human rights law and climate change the Gezi Park protests and forest fires Throughout this volume the contributors consider the formidable challenges to the Kurdish initiatives such as state repression damaged infrastructure and oil dependency Nevertheless contributors assert that the West has much to learn from the Kurdish ecological paradigm which offers insight into social movement debates about development and decolonization     *The Invisible Farm* Thomas Pawlick, 2001 The nature of rural life and food production is changing dramatically but remains overlooked by the major media The Invisible Farm provides the first substantial accounting of this problem addressing issues such as habitat destruction loss of biodiversity pollution and soil degradation Pawlick supplies readers with frightening examples of events taking place worldwide without public awareness As these environmental problems get worse farm reporters are disappearing from newspapers and television Rural news and environmental issues are increasingly neglected Pawlick argues that this lack of interest is partly due to less agricultural journalism training at universities As a result massive changes in farming distribution and production continue unabated
