moneylending agreements between business borrowers and their debt investors without the involvement of banks In China it

remains difficult for private entrepreneurs to obtain sufficient loans from state owned banks Thus private lending has been a vital alternative financing channel for over 80 million businesses which are reliant on private funds as their major source of operating capital The market volume of private financing stands at 5 trillion yuan 783bn making it one of the largest shadow banking systems in the world Despite the wide popularity and systemic importance of private lending activities they have remained outside of the official regulatory framework leading to extra financial risks In 2011 China's private lending sector encountered a severe financial crisis as thousands of business borrowers failed to repay debts and fell into bankruptcy Lots of bosses who found it impossible to liquidate debts ran away to hide from creditors The financial turmoil has caused substantial monetary losses for investors across the country which triggered social unrest and undermined the financial stability This book is a timely work intended to demystify China's private lending market by investigating its historical development operating mechanism and special characteristics It evaluates the causes and effects of the latest financial crisis by considering a number of real cases relating to helpless investors and runaway bosses It conducts an in depth doctrinal analysis of Chinese laws and regulations regarding private lending transactions It also examines China s ongoing financial reform to bring underground lending activities under official supervision Finally the book points out future development paths for the private lending market It offers suggestions for global policymakers devising an effective regulatory framework for shadow banking It appeals to researchers lecturers and students in several fields including law business finance political economy public policy and China study
