**Echoes of Earth** Sean Williams, Shane Dix, 2014-04-01 In this dazzling adventure from the New York Times bestselling author a man adrift in space finds himself facing the edge of madness Jack McDevitt The Frank Tipler is just one of a thousand survey vessels sent out into the bubble of space surrounding Earth seeking habitable worlds and signs of advanced life Its crew has stumbled across artifacts left behind by a benevolent trader species but the decision to study them is fraught with danger and uncertainty The Tipler s crew consists of forty flawed electronic copies of human beings some of them profoundly damaged and Earth stopped responding to signals over a century ago Caught between madness and political machinations Alander stands on the brink of what might be the greatest discovery humanity has ever made and a gift that humanity can t afford to accept ECHOES OF EARTH is a dazzling adventure sweeping the reader along from marvel to wonder and it includes one of the most heart stopping moments I ve encountered in a novel in years Jack McDevitt The book can t be discussed or even described without spoiling some of the surprises which are mutually reinforcing as well as juicy in themselves I will however give in to the temptation to drop a few more of the names that came to mind as I was reading the Three Gregs Bear Benford Egan Linda Nagata and Frederik Pohl As the first of a series ECHOES promises to rev its Ideas right past the red line and drive them hard Locus The science in Dix

and Williams's work shines entrancing with its glitter and innovation and you won't find any of their novels without fully fleshed out characters complex plots vivid settings and thoughtful exploration of issues SF Site The authors have already made a name for themselves as writers of intelligent space opera and ECHOES OF EARTH is sure to further bolster that reputation The book is chock full of marvelous events cosmic significance mysterious alien motivations and the wonder of outer space Science Fiction Chronicle Winner of the Ditmar Award *Video Source Book*, 2006 A guide to programs currently available on video in the areas of movies entertainment general interest education sports recreation fine arts health science business industry children juvenile how to instruction **Nonfiction Reading Comprehension Grade 6** Debra Housel, 2003-06-30 After reading nonfiction passages about science geography or history topics students answer multiple choice and short answer questions to build seven essential comprehension skills *The Star Sailors* Gary L. Bennett, 2005-07-19 Throughout the history of the human race there have been adventurers who must test the limits of exploration iconoclasts who will never be satisfied with peace at the expense of ignorance And ignorance will be dangerous indeed if it is true that the Apollyoni exist In a Galactic Federation without war it has been hard to imagine evil until the expedition to Ahriman ended in such horrible violence that its lone survivor Coni Sanderson had to be almost completely reconstructed For Coni's sake Greg Sheldon wants more than anything to go beyond the perimeter to search out the truth Richard Highstreet's father was lost on one of the last major expeditions and he too would travel anywhere to find out why Outstanding courage has made Ben Wilson their commander on a desperate and illegal mission through metaspace and he knows that if Art Cooke the fourth crewmember of the Odyssey knew the real reason for the voyage he would have stopped it It will be Ben's job to keep them from destroying each other before they reach their destination because when that destination is reached they may have more destruction on their hands than any of them could ever have imagined possible **School Library Journal**, 2000 **The Video Source Book** David J. WEINER, 1990 **Science, Entertainment and Television Documentary** Vincent Campbell, 2016-05-13 The shift from traditional documentary to factual entertainment television has been the subject of much debate and criticism particularly with regard to the representation of science New types of factual programming that combine documentary techniques with those of entertainment formats such as drama game shows and reality TV have come in for strident criticism Often featuring spectacular visual effects produced by Computer Generated Imagery these programmes blur the boundaries between mainstream science and popular beliefs Through close analysis of programmes across a range of sciences this book explores these issues to see if criticisms of such hybrid programmes as representing the rotting carcass of science TV really are valid Campbell considers if in fact when considered in relation to the principles practices and communication strategies of different sciences these shows can be seen to offer more complex and rich representations that construct sciences as objects of wonder awe and the sublime
