Rainforest Tony Juniper, 2018-03-29 Rainforests are the lungs of our planet regulators of the earth's temperature and weather They are also home to 50 per cent of the world's animals and plants which for centuries have been the source of many of our key medicines And yet we've all heard of their systematic destruction the raising of trees to make way for plantations of oil palms or cattle the disenfranchisement of indigenous peoples and the corruption that leads to illegal logging and pollution But this is the full story you've never heard an in depth wide ranging first hand narrative that not only looks at the state of the world's tropical rainforests today and the implications arising from their continuing decline but also at what is being done and can be done in future to protect the forests and the 1.6 billion people that depend upon them It is inspirational too in its descriptions of the rainforest's remarkable birds and plants and its indigenous people *Rainforest* is a personal story drawing on the author's many years experience at the frontline of the fight to save the rainforests explaining the science and history of the campaigns and what it has felt like to be there amid the conflicts and dilemmas *Rainforest Radio* Georgia Ennis, 2025 *Rainforest Radio* follows Napo Kichwa media producers performers and consumers across a disrupted Amazon rainforest to understand the effects of different methods and media in language reclamation projects

Isle of Fire Christian A. Kull, 2004-07-19 Long considered both best friend and worst enemy to humankind fire is at once creative and destructive On the endangered tropical island of Madagascar these two faces of fire have fueled a century long conflict between rural farmers and island leaders Based on detailed fieldwork in Malagasy villages and a thorough archival investigation *Isle of Fire* offers a detailed analysis of why Madagascar has always been aflame why it always will be aflame and ultimately as Christian Kull argues why it should remain aflame *Islands of Rainforest* Edvard Hviding, Tim Bayliss-Smith, 2018-05-08 This title was first published in 2000 An original and thought provoking analysis of modern initiatives in the tropical rain forest While issues such as logging eco timber eco tourism have been widely analyzed from an outsider's perspective this book considers them from the local people's viewpoint in terms of a long history of the rainforest

uses The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless nor is it primarily spiritual or mystical It is in fact firmly connected to modern realities while still being rooted in historical beliefs and practices Standing at the intersection of anthropology historical geography and rainforest ecology and also at the interface of the local and the global this ethnographically grounded study dispels a number of commonly held assumptions It reveals how processes of impact are actually two way interactions as local communities in Melanesia incorporate industries like logging into rapidly evolving post colonial society and economy **Probing the Chemistry/climate Connection** ,1990

A Little

Journey to South Africa and Up the East Coast Jennie R. White (i.e. Rosamond Jane), Adelaide Smith, 1908 **Tropical Rain Forest: A Wider Perspective** F.B. Goldsmith, 2012-12-06

The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development. The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources. Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities. However, while forest cover in some temperate countries is increasing, irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest. While accepting the urgency of the situation and the need for greater coherence of action at a global level, the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance.

Regional Cooperation in Amazonia Maria Antonia Tigre, 2017-08-28. In *Regional Cooperation in Amazonia: A Comparative Environmental Law Analysis*, Maria Antonia Tigre provides a broad overview of the international, regional, and national law applied to the Amazon rainforest and investigates efforts at regional cooperation for the protection of the Amazonian ecosystem. For the last four decades, cooperation among the eight countries in which the rainforest lies was primarily induced by the Amazon Cooperation Treaty (ACT). Originally adopted to ensure national sovereignty, the ACT gradually evolved towards a framework for sustainable development. Based on the challenges faced by the treaty and its subsequent instruments, Maria Antonia Tigre analyzes ways in which the ACT can be more effectively applied, leading to practical results that reduce deforestation. These specifically relate to the enforceability of the right to the environment, the implementation of protected areas, and the development of financial mechanisms to fund initiatives.
