Giants Monsters and Dragons Carol Rose,2001-12-04 Contains alphabetically arranged entries that describe the imaginary creatures found in legends religions folklore oral history and theologies around the world **An Encyclopedia of Shamanism Volume 2** Christina Pratt,2007-08-01 Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development **Level 1: Rainbow Serpent** James V. Marshall,2019 **Seeing the Inside** Luke Taylor,1996 Seeing the Inside is the first detailed study of one of the world s great visual art traditions and its role in the society that produces it The bark painting of Aboriginal artists in western Arnhem Land is the product of a unique tradition of many thousands of years duration In recent years it has attracted enormous interest in the rest of Australia and beyond with the result that the artists who live primarily as hunters in this relatively secluded region of northern Australia now paint for sale to the world art market Though the richness and power of Aboriginal arts are now belatedly finding wide recognition they remain insufficiently understood In this thoroughly illustrated book Luke Taylor examines the creative methods of the bark painters and the cultural meaning of their work He discusses on the one hand the arrangements which allow the artists to project their culture on to an international stage and on the other the continuing social and religious roles of their paintings within their own society The result is a remarkable and fascinating picture of artistic creativity in a changing world **Aboriginal Darwin** Toni Bauman,Samantha Wells,Julie Therese Wells,2006 To most visitors and locals Darwin is a vibrant tropical city in the Top End Although not always obvious to visitors Darwin is also a living Aboriginal cultural landscape Aboriginal Darwin peels back layers to show the rich heritage and complex cultures of Aboriginal people both before and since colonisation It includes contemporary and historical sites that range from the harbor to the beaches monsoon forests gardens parks camping places exhibitions cultural displays and buildings in the CBD supplemented by information about sites not accessible to visitors There are as many ways of seeing Aboriginal Darwin as there are Aboriginal people This guide provides insights into the enormous economic cultural social and historical contributions of Aboriginal people to the city Beautifully illustrated Aboriginal Darwin s easy to use layout allows users to explore at their own pace Contemporary Archaeology in Theory Robert W. The Invention of God in Indigenous Societies James Cox, 2014-09-19 Indigenous societies around the world have been historically disparaged by European explorers colonial officials and Christian missionaries Nowhere was this more evident than in early descriptions of indigenous religions as savage primitive superstitious and fetishistic Liberal intellectuals both indigenous and colonial reacted to this by claiming that before indigenous peoples ever encountered Europeans they all believed in a Supreme Being The Invention of God in Indigenous Societies argues that by alleging that God can be located at the core of pre-Christian cultures this claim effectively invents a tradition which only makes sense theologically if God has never left himself without a witness Examining a range of indigenous religions from North America Africa and Australasia the Shona of Zimbabwe the Rainbow Spirit Theology in Australia the Yup'ik of Alaska and the M'ori of New Zealand the book argues that the interests of indigenous societies are best served by carefully describing their religious beliefs and practices using historical and phenomenological methods just as would be done in the study of any world religion

Cox, 2022-02-24 This book compiles James L. Cox's most important writings on a phenomenology of Indigenous Religions into one volume with a new introduction and conclusion by the author Cox has consistently exemplified phenomenological methods by applying them to his own field studies among Indigenous Religions principally in Zimbabwe and Alaska but also in Australia and New Zealand Included in this collection are his articles in which he defines what he means by the category religion and how this informs his precise meaning of the classification Indigenous Religions These theoretical considerations are always illustrated clearly and concisely by specific studies of Indigenous Religions and their dynamic interaction with contemporary political and social circumstances This collection demonstrates the continued relevance of the phenomenological method in the study of religions by presenting the method as dynamic and adaptable to contemporary social contexts and as responsive to intellectual critiques of the method *Australian Wetland Cultures* John Charles Ryan, Li Chen, 2019-10-31 Among the most productive ecosystems on earth wetlands are also some of the most vulnerable *Australian Wetland Cultures* argues for the cultural value of wetlands Through a focus on swamps and their conservation the volume makes a unique contribution to the growing interdisciplinary field of the environmental humanities The authors investigate the crucial role of swamps in Australian society through the idea of wetland cultures The broad historical and cultural range of the book spans pre settlement indigenous Australian cultures nineteenth century European colonization and contemporary Australian engagements with wetland habitats The contributors situate the Australian emphasis in international cultural and ecological contexts Case studies from Perth Western Australia provide practical examples of the conservation of wetlands as sites of interlinked natural and cultural heritage The volume will appeal to readers with interests in anthropology Australian studies cultural studies ecological science environmental studies and heritage protection *Rainbows* Daniel MacCannell, 2018-04-15 The rainbow is a compelling spectacle in nature a rare evanescent and beautiful bridge between subjective experience and objective reality and no less remarkable as a cultural phenomenon A symbol of the Left since the German Peasants War of the 1520s it has been adopted by movements for gay rights the environment multiculturalism and peace around the globe and has inspired poets artists and writers including John Keats Caspar David Friedrich Edgar Allan Poe and Nathaniel Hawthorne In this book the first of its kind Daniel MacCannell offers an enlightening and instructive guide to the rainbow's multicolored relationship with humanity The scientific discovery of the rainbow is a remarkable tale taking in ancient Greece and Rome medieval Persia and Islamic Spain But even as we've studied rainbows adopted their image and penned odes to them for millennia rainbows have also been regarded as ominous or even dangerous in myth and religion In the twentieth century the rainbow emerged as kitsch arcing from the musical film

version of The Wizard of Oz to 1980s sitcoms and children's cartoons Illustrated throughout in prismatic color MacCannell's Rainbows explores the full spectrum of rainbows nature and meaning offering insight into what rainbows are and how they work how we arrived at our current scientific understanding of the phenomenon and how we have portrayed them in everything from myth to the arts politics and popular culture
