Rain Forests Hai Song Harvey, 2002 Rain forests contain the greatest variety of animal and plant life on earth and they are being destroyed more rapidly than any other type of wild habitat Many environmentalists and scientists believe that almost all the rain forests will be eliminated in less than thirty years Others continue to believe that the threat of their destruction is exaggerated This anthology debates the threats to the rain forests and measures designed to ensure their continued existence

Governing the Rainforest Eve Z. Bratman, 2019-09-24 Sustainable development is often thought of as a product that can be obtained by following a prescribed course of interventions Rather than conceptualizing it as a sweet spot of economic ecological and social balance sustainable development is an ongoing process of embroilments requiring constant negotiation of often competing aims Sustainable development politics yield highly uneven results among different members of society and different geographic areas As this book argues such imbalances mean that sustainable development processes often prioritize economic over environmental goals perpetuating and reinforcing economic and political inequalities Governing the Rainforest looks at development and conservation efforts in the Brazilian Amazon where the government and corporate interests bump up against those of environmentalists and local populations This book asks why sustainable development continues to be such a powerful and influential idea in the region and what impact it has had on various political and economic interests and geographic areas In other words as Eve Z Bratman argues sustainable development is a political practice in itself This book offers detailed case study analysis including of the creation of vast conservation corridors the construction of one of the largest hydroelectric plants in the world and new forms of land settlement projects Based on a decade of Bratman's ethnographic fieldwork throughout Brazil and particularly along the Trans Amazonian Highway Governing the Rainforest offers a fresh take on sustainable development within a multi level analysis of actors discourses and practices

Amazonian Rain Forests Carl F. Jordan, 2012-12-06 DEVELOPMENT AND DISTURBANCE IN AMAZON FORESTS Contrasting Impressions 6 2 The rain forests of the Amazon Basin cover

approximately 5 8 x 10 km Salati and Vose 1984 Flying over even just part of this basin one gazes hour after hour upon this seemingly infinite blanket of green The impression of immensity is similar when viewed from the Amazon River itself or from its tributaries From a hammock on the shaded deck of a riverboat the immensity of the forest presents an incredible monotony as one view of the shoreline blends unnoticeably into another From both perspectives the overwhelming reaction to the sea of trees that stretches from horizon to horizon is a sense of the vastness of the rain forest In September 1985 I got a different impression of the rain forest Several students and I journeyed in a self propelled car along the single track railroad that stretches almost 1000 km from the Carajas iron ore mine in the rain forest of Para State Brazil all the way to Sao Luis on the coast Fig 1 1

Corridor Ecology Jodi A. Hilty, William Z. Lidicker Jr., Adina M. Merenlender, 2012-02-13 Corridor Ecology presents guidelines that combine conservation science and practical experience for maintaining enhancing and creating connectivity between natural areas with an overarching goal of conserving biodiversity It offers an objective carefully interpreted review of the issues and is a one of a kind resource for scientists landscape architects planners land managers decision makers and all those working to protect and restore landscapes and species diversity *The regional travel guide for Tshopo (Democratic Republic of the Congo)*, 2025-09-24 *Landscape Approaches in Mammalian Ecology and Conservation* William Zander Lidicker, 1995 This book explores the latest ideas about landscapes as they apply to mammalian ecology and conservation The Contributors examine mammalian field studies and experimental model systems to landscape ecology and then present data on the use of such experimental protocols With its international perspective and incisive coverage this volume will be an essential resource for anyone concerned with mammalian and landscape ecology

Rainforest Cities John O. Browder, Brian J. Godfrey, 1997 Rainforest Cities represents a valuable contribution to our current knowledge of regional development and environmental studies and will be of interest to urban planners geographers Amazon regional specialists and interdisciplinary students of international development *Linkages in the Landscape* Andrew F. Bennett, 2003 The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation Habitat corridors are sometimes proposed as an important element within a conservation strategy Examples are given of corridors both as pathways and as habitats in their own right Includes detailed reviews of principles relevant to the design and management of corridors their place in regional approaches to conservation planning and recommendations for research and management Rainforest Corridors Nigel J. Corridor Ecology, Second Edition Jodi A. Hilty, Annika T.H. Keeley, William Z. Lidicker Jr., Adina M. Merenlender, 2019-04-23 Migrating wildlife species across the globe face a dire predicament as their traditional migratory routes are cut off by human encroachment Forced into smaller and smaller patches of habitat they must compete more aggressively for dwindling food resources and territory This is more than just an unfortunate side effect of human progress As key species populations dwindle ecosystems are losing resilience and face collapse and along with them the ecosystem services we depend on Healthy ecosystems need healthy wildlife populations One possible answer Wildlife corridors that connect fragmented landscapes This new and expanded second edition of Corridor Ecology Linking Landscapes for Biodiversity Conservation and Climate Adaptation captures the many advances in the field over the past ten years It builds on concepts presented in the first edition on the importance and practical details of maintaining and restoring land connectivity New to this edition is a guest edited chapter on ecological connectivity in oceans including a detailed discussion on pelagic marine corridors and how coastal corridors can provide critical connectivity between marine protected areas Another new chapter considers the effects of climate change on habitat and offers recommendations on designing effective corridors as landscapes change with shifting climate conditions The book also includes a discussion of corridors in the air for migrating flying species from birds to bats butterflies and even plant propagules a concept so new that a term to describe it has yet to be coined All chapters are thoroughly revised and updated Practitioners as well as serious scholars of landscape ecology and the science of protecting biodiversity will find this new edition of corridor ecology science an indispensable resource

Australia's Lost World Michael Archer, Suzanne Hand, Suzanne J. Hand, Henk Godthelp, 2000 In Queensland in northeast Australia lies one of the most significant fossil deposits in the world Riversleigh Here the remains of many thousands of weird and wonderful prehistoric animals have been

superbly preserved in the limestone outcrops There are marsupial lions carnivorous kangaroos 23 foot long pythons primitive platypuses and early ancestors of the now extinct Tasmanian tiger So important is this site to our understanding of what has happened to Australia and its living cargo over the last 25 million years that Riversleigh has been inscribed on the World Heritage List Michael Archer Suzanne J Hand and Henk Godthelp the principal scientists on a remarkable excavation since 1976 explain the vast environmental and geographic changes that have occurred in this area since Australia broke away from the supercontinent of Gondwana and how the animals on board this continental raft evolved through the ages Photographs and evocative artwork bring to life the teeming tropical world that once existed in the now arid wastes of Riversleigh and the authors discuss some of the unusual techniques used on a dig They describe how to recognize fossils how to date them and how to reconstruct extinct animals from them Originally published as Riversleigh The Story of Animals in Ancient Rainforests of Inland Australia this award winning book is being issued for the first time in the United States Human Migration María de Lourdes Muñoz-Moreno, Michael H. Rainforest Corridors: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Rainforest Corridors : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
