McInnes,2013-11-27 Solar sailing offers the possibility of low cost long distance missions impossible for any other type of conventional spacecraft The book provides a detailed account of solar sailing at a high technical level but in a way accessible to the scientifically informed layman Solar sail orbital dynamics and solar radiation pressure form the foundations of the book but the engineering design of solar sails is also considered along with potential mission applications This book introduces the subject and at the same time provides a technical reference source **Aero-hydrodynamics and the Performance of Sailing Yachts** Fabio Fossati,2009-12-18 A groundbreaking technical analysis of yacht design based on cutting edge research in the field of aero hydrodynamics *Solar Sailing for Deep-Space Explorations* Chen Gao,Wei Wang,2025-11-02 This book focuses on the solar sailing technique and investigates in detail its applications for deep space explorations focusing on the Earth Moon Sun Earth and Sun planet systems Solar sailing is an advanced and propellant free form of low thrust propulsion and therefore a perfect option for energy demanding and long duration space missions This book covers the topics on non Keplerian orbit designs low thrust station keeping and spacecraft formation flying using solar sailing from in particular the perspectives of dynamics and control Given its breadth of coverage the book offers a valuable reference guide for researchers and engineers who are interested in the solar sailing technique and in particular its dynamics and control in deep space exploration missions *Sailing Shipping and Maritime Labor in Camogli (1815—1914)* Leonardo Scavino,2022-08-22 This book explores the historical evolution of a Mediterranean village that radically changed its core self sustaining activities in less than a century from fishing for anchovies in the Ligurian Sea to rounding Cape Horn Drawing on a vast set of unpublished archival sources this book addresses a micro historical subject to investigate macro historical processes including the technological transition from sail to steam and globalization At the core of the book lie Camogli s rise in the world shipping industry and the transformations that occurred in its maritime labor system seaborne trade maritime routes individual careers in seafaring represent the vivid elements that contribute to the book s dive into the nineteenth century maritime world **Advances in Solar Sailing** Malcolm Macdonald,2014-02-03 This book presents the best contributions of the the Third International Symposium on Solar Sailing Glasgow 11 13 June 2013 It is a rapid snap shot

of the state of the art of solar sail technology in 2013 across the globe capturing flight programs technology development programs and new technology and application concepts The book contains contributions from all of the leading figures in the field including NASA JAXA ESA DLR as well as university and industry experts It therefore provides a unique reference point for the solar sail technology The book also includes key contributions from the prospective users of solar sail technology which will allow the technology to be considered by the user in this unique context *Robotic Sailing 2014* Fearghal Morgan,Dermot Tynan,2014-08-01 An autonomous sailboat robot is a boat that only uses the wind on its sail as the propelling force without remote control or human assistance to achieve its mission Robotic sailing offers the potential of long range and long term autonomous wind propelled solar or wave powered carbon neutral devices Robotic sailing devices could contribute to monitoring of environmental ecological meteorological hydrographic and oceanographic data These devices can also be used in traffic monitoring border surveillance security assistance and rescue The dependency on changing winds and sea conditions presents a considerable challenge for short and long term route and stability planning collision avoidance and boat control Building a robust and seaworthy sailing robot presents a truly complex and multi disciplinary challenge for boat designers naval architects systems electrical engineers and computer scientists Over the last decade several events such as Sailbot World Robotic Sailing Championship and the International Robotic Sailing Conference WRSC IRSC and Microtransat have sparked an explosion in the number of groups working on autonomous sailing robots Many of the challenges in building truly autonomous sailing robots still remain unsolved These proceedings present the work of researchers on current and future challenges in autonomous sailboat development presented at the WRSC IRSC 2014 in Galway Ireland 8th 12th September 2014 *Deep-Space Probes* Greogory L. Matloff,2013-11-27 This excellent book by Dr Gregory Matloff could be viewed as a large multi disciplinary compendium of past research current investigations and future research in astronautics However unlike conventional works that are usually closed this book is an open guide in three main respects it contains progressive exercises as the chapter and section topics evolve it provides the reader with many updated references and it clearly indicates projected research areas that could become current research in the near future For a student the included exercises could be transformed into small worksheets or notebooks featuring many modern symbolic or algebraic computation systems that run on desktop or laptop computers Thus rapid and progressive study is possible a sort of learning library driven by the author and by the bibliography at the end of each chapter More than 340 references for both professionals and students have been selected to provide the reader with a sound basis for expanding his or her knowledge of the many different subjects dealt with authoritatively by the author who for several decades has worked actively in various fields of astronautics A systematic and unhurried study of this book will produce for the reader an extraordinarily enlarged number based view of spaceflight and its significant impact on our future global society **Robotic Sailing** Alexander Schlaefer,Ole Blaurock,2011-07-15 While sailing has a long tradition both as a means of transportation and as a sport robotic

sailing is a fairly new area of research One of its unique characteristics is the use of wind for propulsion On the one hand this allows for long range and long term autonomy On the other hand the dependency on changing winds presents a serious challenge for short and long term planning collision avoidance and boat control Moreover building a robust and seaworthy sailing robot is no simple task leading to a truly interdisciplinary engineering problem These proceedings summarize the state of the art as presented at the International Robotic Sailing Conference 2011 Following an overview of the history of autonomous sailing a number of recent boat designs is presented ranging from small one design boats to vessels built to cross the Atlantic Ocean Subsequently various aspects of system design and validation are discussed further highlighting the interdisciplinary nature of the field Finally methods for collision avoidance localization and route planning are covered

prince of pilots had a charmed life in every sense of the word George Bernard Shaw Sent to France with the Royal Flying Corps at just seventeen and later a member of the famous 56 Squadron Cecil Lewis was an illustrious and passionate fighter pilot of the First World War described by Bernard Shaw in 1935 as a thinker a master of words and a bit of a poet In this vivid and spirited account the author evocatively sets his love of the skies and flying against his bitter experience of the horrors of war as we follow his progress from France and the battlefields of the Somme to his pioneering defence of London against deadly night time raids

Deep Space Probes Gregory L. Matloff, 2006-08-31 The Space Age is nearly 50 years old but exploration of the outer planets and beyond has only just begun *Deep Space Probes* Second Edition draws on the latest research to explain why we should explore beyond the edge of the Solar System and how we can build highly sophisticated robot spacecraft to make the journey Many technical problems remain to be solved among them propulsion systems to permit far higher velocities and technologies to build vehicles a fraction of the size of today's spacecraft Beyond the range of effective radio control robot vehicles for exploring deep space will need to be intelligent thinking craft able to make vital decisions entirely on their own Gregory Matloff also looks at the possibility for human travel into interstellar space and some of the immense problems that such journeys would entail This second edition includes an entirely new chapter on holographic message plaques for future interstellar probes a NASA funded project

Maritime Psychology Malcolm MacLachlan, 2017-01-21 This first of its kind volume assembles current research on psychosocial issues and behavioral and safety concerns inherent in life and careers at sea Focusing mainly on the commercial maritime transport sector it sets out the basic concepts of maritime psychology in the contexts of health and occupational psychology and illustrates more expansive applications across nautical domains A systems perspective and detailed case studies spotlight unique challenges to mariners work performance personal and environmental health and safety it also provides support for psychometric assessment of seafarers and describes emerging uses for the healing properties of the sea and sailing The book is a springboard for continued research and practice development further interaction between psychology and the maritime world and the continued broadening and deepening of the field Among the topics covered Positive psychology and wellbeing at sea Transferring learning across safety critical industries Occupational stress in seafarers The psychology of ship architecture and design Motion sickness susceptibility and management at sea Risk communication during a maritime disaster Written with clarity and nuance reflecting the vastness of marine experience *Maritime Psychology* will be of interest to lecturers researchers and students of occupational and health psychology and maritime science and to social and health scientists and practitioners in these and related fields

Handbook of Space Resources Viorel Badescu, Kris Zacny, Yoseph Bar-Cohen, 2023-04-27 Earth has limited material and energy resources while these resources are virtually unlimited in space It is only a matter of time before planetary resources are mined and used in situ to sustain human and robotic exploration or returned to Earth for commercial gain This book covers a number of aspects related to space resources In particular subjects

related to mission concepts exploration approaches mining and extraction technologies commercial potential and regulatory aspects of space resources are covered in detail This book is therefore a good resource for readers who seek background and deeper understanding of space resources related activities

Optical Nano and Micro Actuator Technology George K. Knopf, Yukitoshi Otani, 2017-12-19 In Optical Nano and Micro Actuator Technology leading engineers material scientists chemists physicists laser scientists and manufacturing specialists offer an in depth wide ranging look at the fundamental and unique characteristics of light driven optical actuators They discuss how light can initiate physical movement and control a variety of mechanisms that perform mechanical work at the micro and nanoscale The book begins with the scientific background necessary for understanding light driven systems discussing the nature of light and the interaction between light and NEMS MEMS devices It then covers innovative optical actuator technologies that have been developed for many applications The book examines photoresponsive materials that enable the design of optically driven structures and mechanisms and describes specific light driven technologies that permit the manipulation of micro and nanoscale objects It also explores applications in optofluidics bioMEMS and biophotonics medical device design and micromachine control Inspiring the next generation of scientists and engineers to advance light driven technologies this book gives readers a solid grounding in this emerging interdisciplinary area It thoroughly explains the scientific language and fundamental principles provides a holistic view of optical nano and micro actuator systems and illustrates current and potential applications of light driven systems

Advances in Maritime Technology and Engineering Carlos Guedes Soares, Tiago A. Santos, 2024-05-08 Advances in Maritime Technology and Engineering comprises a collection of the papers presented at the 7th International Conference on Maritime Technology and Engineering MARTECH 2024 held in Lisbon Portugal on 14-16 May 2024 This Conference has evolved from the series of biannual national conferences in Portugal which have become an international event reflecting the internationalization of the maritime sector and its activities MARTECH 2024 is the seventh of this new series of biannual conferences This book comprises 142 contributions that were reviewed by an International Scientific Committee Advances in Maritime Technology and Engineering is dedicated to maritime transportation ports as well as maritime safety and reliability It further comprises sections dedicated to ship design cruise ship design and to the structural aspects of ship design such as ultimate strength and composites subsea structures as pipelines and to ship building and ship repair The Proceedings in Marine Technology and Ocean Engineering series is dedicated to the publication of proceedings of peer reviewed international conferences dealing with various aspects of Marine Technology and Ocean Engineering The series includes the proceedings of the following conferences the International Maritime Association of the Mediterranean IMAM conferences the Marine Structures MARSTRUCT conferences the Renewable Energies Offshore RENEW conferences and the Maritime Technology MARTECH conferences The Marine Technology and Ocean Engineering series is also open to new conferences that cover topics on the sustainable exploration of marine resources in various fields

such as maritime transport and ports usage of the ocean including coastal areas nautical activities the exploration and exploitation of mineral resources the protection of the marine environment and its resources and risk analysis safety and reliability The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research
