## **Salinity Crisis Landscapes Communities And Politics:**

*The Salinity Crisis* Quentin Beresford, 2001 Focuses on dryland salinity in W A s wheatbelt *Irrigation, Salinity, and Rural Communities in Australia's Murray-Darling Basin, 1945-2020* Daniel Rothenburg, 2023-01-13 This book explores the issue of salinization in the context of contemporary conflicts about irrigation water and the environment in Australia considering the Murray Darling Basin in particular It provides an environmental and social history charting the transformation of rural communities in the basin through the salinization of soils and water Focusing on the Goulburn Murray Irrigation district in the southwest of the Murray Darling basin the largest irrigation district in Australia it explores the history of state directed large scale engineering in the district where the environment has been altered dramatically to facilitate white agricultural settlement inland Changes to the landscape led to extensive salinization however a significant environmental threat in Australia This book traces the impact of these changes on rural communities taking a bottom up approach highlighting the connections between environmental social and political change It provides an important reflection on the importance of environmental history for facing the challenges posed by anthropogenic climate change *Green Urbanism Down Under* Timothy Beatley, Peter Newman, 2012-09-26 In this immensely practical book Timothy Beatley sets out to answer a simple question what can Americans learn from Australians about greening city life *Green Urbanism Down Under* reports on the current state of sustainability practice in Australia and the many lessons that U S residents can learn from the best Australian programs and initiatives Australia is similar to the United States in many ways especially in its energy footprint For example Australia s per capita greenhouse gas emissions are second only to those of the United States A similar percentage of its residents live in cities 85 percent in Australia vs 80 percent in the United States And it suffers from parallel problems of air and water pollution a national dependence on automobiles and high fossil fuel consumption Still after traveling throughout Australia Beatley finds that there are myriad creative responses to these problems and that they offer instructive examples for the United States *Green Urbanism Down Under* is a very readable collection of solutions Although many of these innovative solutions are little known outside Australia they all present practical possibilities for U S cities Beatley describes green transport projects city farms renewable energy plans green living programs and much more He considers a host of public policy initiatives and scrutinizes regional and state planning efforts for answers In closing he shares his impressions about how Australian results might be applied to U S problems This is a unique book hopeful constructive and filled with ideas that have been proven to work It is a must read for anyone who cares about the future of American cities *Yes, Premier* John Wanna, Paul D. Williams, 2005 Since 2002 and for the first time since Federation all state and territory governments in Australia have been held by the Australian Labor Party *Yes Premier* features a chapter on each state or territory and in each case focuses on the leader who has led their party to power and so created this unprecedented and historical situation It examines each Labor premier and in Tasmania s case two and territory chief

minister's individual rise to power and their political and personal style The chapters are written by experts in the politics and political culture of their home state Part personal and part political biographies the chapters also assess the instruments of leadership any modern state or territory leader must master in order to remain in the top job **BOOK JACKET** **Water Politics in the Murray-Darling Basin** Daniel Connell, 2007 In January 2007 the Australian Prime Minister John Howard announced a 10 billion plan to reform rural water management Most of the effort will focus on the Murray Darling Basin In this book Daniel Connell explains why there is a crisis in the Murray Darling He highlights the disastrous consequences of a century of fitful reluctant co operation between the six governments responsible for the region Connell argues that a new institutional system is essential but a Commonwealth takeover is not the best answer Instead the Commonwealth government should use its constitutional and financial power to force the States to adopt national policies and stick to them whatever the local politics The States would continue to play a substantial role but the controls would be tighter the framework more comprehensive He also shows how the National Water Initiative the great blueprint for water reform has stalled with many of its most important recommendations ignored So far the public debate about the future of the Murray Darling Basin has concentrated on new technical projects and increased water trading Connell argues that unless institutional change is given priority hundreds of millions of dollars of annual investment will be frittered away and the crisis will continue Handbook of Engineering Hydrology (Three-Volume Set) Saeid Eslamian, 2018-10-03 While most books examine only the classical aspects of hydrology this three volume set covers multiple aspects of hydrology and includes contributions from experts from more than 30 countries It examines new approaches addresses growing concerns about hydrological and ecological connectivity and considers the worldwide impact of climate change **Sustainability and Change in Rural Australia** Chris Cocklin, Jacqui Dibden, 2005 By addressing themes such as social and economic change government policy and gender relations this volume tackles the thematic complexities of sustainability It attempts to understand how small rural communities have survived in the past what factors shaped them and how these factors will impact on their future survival

**Disasters that Changed Australia** Richard Evans,2009 From natural phenomenon such as Cyclone Tracy and the Ash Wednesday and Black Friday fires to key moments in our military history such as Flanders in 1917 and the fall of Singapore this is an essential guide to understanding the people the ideas and the events that defined the course of Australia s history

**Australia, New Zealand, and the Pacific** Donald S. Garden,2005-08-19 A fascinating study of the environmental history of Australia New Zealand and the islands of the Pacific from the time of the dinosaurs to the present day Of interest to students and academics alike this book provides a much needed synthesis of the recent literature on the environmental history of Australia and Oceania Part of ABC CLIO s Nature and Human Societies series this book maps out the key trends in the region s environmental history charting the creation of the Australian continent from the ancient land mass of Gondwanaland to the arrival of humans Especially fascinating are the chapters highlighting how successive waves of human migration created environmental havoc throughout the region leading to the collapse of the Easter Island civilization and the spread of nonindigenous flora and fauna From the controversies over the reasons why creatures such as the marsupial lion and the giant kangaroo became extinct to such contemporary problems as deforestation and global warming this book contains sobering lessons for us all

**Biological Diversity** L. N. Petrov,2003 One of the cornerstones of life s wonders is the vast array of species filling the planet From plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be Periodically scientists announce the discovery of a new form of life so it seems as if Earth is capable of producing new species just to keep us on our toes At times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population Given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment To that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us This book is an important tool in understanding and researching the many different life forms spanning the globe Collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation Following this bibliography are author title and subject indexes to allow for further access to this information The sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life s variety

**Rob Riley** Quentin Beresford,2006 Set against the tumultuous background of racial politics in an conflicted nation this book explores Rob Riley s rise and influence as an Aboriginal activist Drawing on perspectives from history politics and psychology this work explores Rob s life as a moral protester and the challenges he confronted in trying to change the destiny of the country

**Old Fields** Richard J. Hobbs,2012-06-22 Land abandonment is increasing as human influence on the globe intensifies and various

ecological social and economic factors conspire to force the cessation of agriculture and other forms of land management The old fields that result from abandonment have been the subject of much study yet few attempts have been made to examine the larger questions raised by old field dynamics Old Fields brings together leading experts from around the world to synthesize past and current work on old fields providing an up to date perspective on the ecological dynamics of abandoned land The book gives readers a broad understanding of why agricultural land is abandoned the factors that determine the ecological recovery of old fields and how this understanding contributes to theoretical and applied ecology Twelve case studies from diverse geographical and climatic areas including Australian rainforest Brazilian Amazonia New Jersey piedmont and South African renosterveld offer a global perspective on the causes and results of land abandonment Concluding chapters consider the similarities and differences among the case studies examine them in the context of ecological concepts and discuss their relevance to the growing field of restoration ecology Old Fields is the first book to draw together studies on old fields from both a theoretical and practical perspective It represents an important contribution to the development of theory on old field dynamics and the practice of ecological restoration on abandoned farmland and the broader implications of old field dynamics to ecology and restoration
