The Equations of Life Charles S. Cockell, 2018-06-19 A groundbreaking argument for why alien life will evolve to be much like life here on Earth We are all familiar with the popular idea of strange alien life wildly different from life on earth inhabiting other planets Maybe it's made of silicon Maybe it has wheels Or maybe it doesn't In The Equations of Life biologist Charles S Cockell makes the forceful argument that the laws of physics narrowly constrain how life can evolve making evolution's outcomes predictable If we were to find on a distant planet something very much like a lady bug eating something like an aphid we shouldn't be surprised The forms of life are guided by a limited set of rules and as a result there is a narrow set of solutions to the challenges of existence A remarkable scientific contribution breathing new life into Darwin's theory of evolution The Equations of Life makes a radical argument about what life can and can't be

The Tragic Sense of Life in Men and Nations Miguel de Unamuno, 1977 The acknowledged masterpiece of Unamuno expresses the anguish of modern man as he is caught up in the struggle between the dictates of reason and the demands of his own heart

Shelley and the Apprehension of Life Ross Wilson, 2013-08-15 Percy Bysshe Shelley in the essay On Life 1819 stated We live on and in living we lose the apprehension of

life Ross Wilson uses this statement as a starting point to explore Shelley's fundamental beliefs about life and the significance of poetry Drawing on a wide range of Shelley's own writing and on philosophical thinking from Plato to the present this book offers a timely intervention in the debate about what Romantic poets understood by life For Shelley it demonstrates poetry is emphatically living melody which stands in resolute contrast to a world in which life does not live Wilson argues that Shelley's concern with the opposition between living and the apprehension of life is fundamental to his work and lies at the heart of Romantic era thought *Thoughts on life from modern writers, ed. by S.S. Copeman* S S Copeman,1886 **The Academy and Literature** ,1903 *The Salt of the Earth* Anna Marie Roos,2007-08-30 Consisting of a series of case studies this book is devoted to the concept and uses of salt in early modern science which have played a crucial role in the evolution of matter theory from Aristotelian concepts of the elements to Newtonian chymistry No reliable study on this subject has been previously available Its exploration of natural history's and medicine's intersection with chemical investigation in early modern England demonstrates the growing importance of the senses and experience as causes of intellectual change from 1650 1750 It demonstrates that an understanding of the changing definitions of salt is also crucial to a historical comprehension of the transition between alchemy and chemistry **THE PENNY MAGAZINE OF THE SOCIETY FOR THE DIFFUSION OF USEFUL KNOWLEDGE** ,1835 **The life of the Lord Jesus Christ, a complete critical examination of the Gospels, tr.
