Invisible Search and Online Search Engines Jutta Haider, Olof Sundin, 2019-03-04 Invisible Search and Online Search Engines considers the use of search engines in contemporary everyday life and the challenges this poses for media and information literacy Looking for mediated information is mostly done online and arbitrated by the various tools and devices that people carry with them on a daily basis Because of this search engines have a significant impact on the structure of our lives and personal and public memories Haider and Sundin consider what this means for society whilst also uniting research on information retrieval with research on how people actually look for and encounter information Search engines are now one of society's key infrastructures for knowing and becoming informed While their use is dispersed across myriads of social practices where they have acquired close to naturalised positions they are commercially and technically centralised Arguing that search searching and search engines have become so widely used that we have stopped noticing them Haider and Sundin consider what it means to be so reliant on this all encompassing and increasingly invisible information infrastructure Invisible Search and Online Search Engines is the first book to approach search and search engines from a perspective that combines insights from the technical expertise of information science research with a social science and humanities approach As such the book should be essential reading for academics researchers and students working on and studying information science library and information science LIS media studies journalism digital cultures and educational sciences

Online Virality Valérie Schafer, Fred Pailler, 2024-08-19 The book Online Virality edited by Valérie Schafer and Fred Pailler C2DH University of Luxembourg aims to provide a comprehensive examination of online virality It explores the many ways we can think about this modern phenomenon and analyse the circulation reception and evolution of viral born digital content Virality and content sharing always intertwine material infrastructural visual and discursive elements This involves various platforms stakeholders intermediaries social groups and communities that are constantly re defining themselves Regulation curation and content moderation politics as well as affects and emotions fears humour empathy hatred are also at the core of online virality The publication offers an interdisciplinary overview on online virality by including different types of scientific inputs such as precise case studies various methodological approaches including close and distant reading visual studies discourse analysis etc as well as historical and socio technical analyses The book is organised around three main topics Expressions and Genres Mobilisations and Engagements Circulation and Infrastructures The first part explores the semiotics of virality the diverse and creative forms of expression specific genres the relation to other media and the affective side of virality such as using humour or provocation The second part focuses on the political dimension of memes and viral content and their use in the context of controversy or political and ideological opposition Finally the third part delves into the often understudied but essential side of virality by examining the role of platforms and their curation in short the infrastructural dimension of virality These three parts allow us to question such fundamental notions linked to virality as

among others circulation reception economy of attention instrumentalisation and affect This volume brings together authors from various disciplines including semiotics history information and communication sciences computer science digital humanities media studies In addition the contributors approach the question via case studies that allow for a perspective that is not exclusively US and European centred Some chapters explore virality in Brazil Chile while the book also examines a wide variety of platforms YouTube Twitter Instagram TikTok video game platforms etc Historical Abstracts Eric H. Boehm,2000 Arts & Humanities Citation Index ,1997 **Forthcoming Books** Rose Arny,1993-12 *Whitaker's Books in Print* ,1998 **Techniek in Nederland in de twintigste eeuw: Delfstoffen, energie, chemie** ,1998
