Connecting People with Technology

George Hayhoe, Helen M. M Grady, 2020-11-26 This book

explores five important areas where technology affects society and suggests ways in which human communication can

facilitate the use of that technology Usability has become a foundational discipline in technical and professional

communication that grows out of our rhetorical roots which emphasize purpose and audience As our appreciation of audience

has grown beyond engineers and scientists to lay users of technology our appreciation of the diversity of those audiences in terms of age geography and other factors has similarly expanded We are also coming to grips with what Thomas Friedman calls the flat world a paradigm that influences how we communicate with members of other cultures and speakers of other languages And because most of the flatteners are either technologies themselves or technology driven technical and professional communicators need to leverage these technologies to serve global audiences Similarly we are inundated with information about world crises involving health and safety issues These crises are driven by the effects of terrorism the aging population HIV AIDS and both human made and natural disasters These issues are becoming more visible because they are literally matters of life and death Furthermore they are of special concern to audiences that technical and professional communicators have little experience targeting the shapers of public policy seniors adolescents and those affected by disaster Biotechnology is another area that has provided new roles for technical and professional communicators We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments Confronting this complex network of issues we re challenged to fashion both our message and the audience s perceptions ethically Finally today s corporate environment is being shaped by technology and the global nature of business Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture

Project: Leadership Haukur Ingi Jonasson, Helgi Thor Ingason, 2018-12-07 Projects need leaders who are able to bring out the best in others unite their teams engage business partners and facilitate harmonious delivery Project Leadership explains the core features of leadership for project managers enabling them to develop a leadership style that is authentic and transparent informed by a perspective of psychological understanding and personal growth This book enables both potential and prominent leaders to dig deeper into the meaning of leadership fostering personal growth which enables professional development It opens with an introductory orientation on leadership and links it with management in general and project management in particular The reader is then encouraged to take an introspective approach underpinned by the fundamentals of cognitive behavioural psychology and theories of personal growth in order to develop authenticity in their leadership style To this end the reader is encouraged to develop an awareness of unconscious aspects of their personality with the help of insights from depth psychology as well as the fundamentals of creative thinking ethical thinking and logical thinking This is all carefully and pragmatically applied to the context of leadership of projects with the aim to foster growth and development in individuals project teams and organisations Project Leadership is also an ideal introductory book for undergraduate and postgraduate leadership programs

Making a Difference Peter Hernon, Nancy Rossiter, 2006-12-30 Leadership is separate from but integral to management and library directors today and for the foreseeable future can be expected to play an institutional

role as they lead the library to contribute towards the mission of their college and university Similarly new courses in library leadership now accompany more traditional ones on managing organizations and information resources However much of the literature on LIS leadership represents a distilled application of principles and practices borrowed from other disciplines with few reports of research from the library field Conceived as a companion to *The Next Library Leadership Libraries Unlimited 2003 Making a Difference* includes not only a discussion of effective attributes but of issues central to the development of leadership qualities strategies and dispositions Essential reading for anyone interested in advancing the quality of leadership within LIS particularly academic librarians in or aspiring to positions of managerial leadership *Advances in Library Administration and Organization* Edward D.
