Service Quality and Management Bernd Stauss, Jos Lemmink, Paul Kunst, 2013-06-29 Introduction Are services millennium proof Certainly not At least not at this moment There is no thorough research needed to derive that conclusion simply ask around The evidence is overwhelming True horror stories exist of all types of services in all types of sectors It is even becoming a business in itself Television shows that are based on customer complaints about services are becoming more and more popular As is the case in the millennium problem management of service companies experiences a lot of problems in the hardware and the software of services There are still problems in defining and developing the service and problems in creating realizing and managing well defined services Is there then no progress at all We believe there is The enormous attention for services has its advantages as well In various places innovations are realized and what is more important are linked to theory Only in this way learning becomes possible Eventually innovative practice will reflect in the development of theory and in turn good practice will be based on solid theory This series tries to support this process by presenting a number of innovative practices and examples of testing theory in service quality marketing and management
