Cities and Solidarities Justin Colson, Arie van Steensel, 2017-01-06 *Cities and Solidarities* charts the ways in which the study of individuals and places can revitalise our understanding of urban communities as dynamic interconnections of solidarities in medieval and early modern Europe This volume sheds new light on the socio economic conditions the formal and informal institutions and the strategies of individual town dwellers that explain the similarities and differences in the organisation and functioning of urban communities in pre modern Europe It considers how communities within cities and towns are constructed and reconstructed how interactions amongst members of differing groups created social and economic institutions and how urban communities reflected a sense of social cohesion In answering these questions the contributions combine theoretical frameworks with new digital methodologies in order to provoke further discussion into the fundamental nature of urban society in this key period of change The essays in this collection demonstrate the complexities of urban societies in pre modern Europe and will make fascinating reading for students and scholars of medieval and early modern urban history
