 J. Jaeger,2004-12-13 The study of speech errors or slips of the tongue is a time honored methodology which serves as a
 window to the representation and processing of language and has proven to be the most reliable source of data for building
 theories of speech production planning However until Kids Slips there has never been a corpus of such errors from children
 with which to work This is the first developmental linguistics research volume to document how online processing is revealed
 in young children ages 18 months through 5 years through their slips of the tongue Thus this text provides a new
 methodology and data source which will greatly expand our ability to uncover the details of early language development
 Professor Jaeger s groundbreaking book incorporates both details of her methodology and findings with implications for
 different aspects of language development including phonetics and phonology the lexicon semantics morphology and syntax
 While all the child data is included in the book a Web site hosted by the author provides readers with the adult data as well
 Kids Slips targets those who study language development in linguistics developmental psychology and speech and hearing as
 well as those who study language representation and processing more generally in the same disciplines *Theory and
