Frames of Justice Leroy H. Pelton,2018-01-16 This work is devoted to analyzing three major frames of justice group justice individual desert and life affirmation and their implications for social policy as well as their reflections in contemporary social policies Pelton finds that all three frames of justice are reflected in the Bible and later the Koran He contends that there is no evidence in the Bible of a genesis or development from one frame of justice to another Rather a sense of justice has existed in the human mind from time immemorial with the three frames coexisting and manifesting themselves in both inter and intra group relations The prominence of one frame over another at any particular point in history or in a particular geographical location is influenced by a variety of factors though it is ultimately open to human choice Pelton compares and contrasts the philosophies of nonviolence and liberalism in regard to the frames and explores the relationships between principle sentiment reason justice and policy He discusses social science s problematic relationship to justice in policymaking for instance how scholars have focused more on the effectiveness of policies largely in terms of statistical outcomes reflecting aggregate data analyses than on their justice He goes on to explore in depth how frames of justice give direction to social policies including those of genocide Frames of Justice is an outstanding work that analyzes the question of justice and social policy while simultaneously exploring the notion of desert in religion philosophy and legislation especially within the context of the moral question of the relationship between means and ends and contrasting it with the principle of life affirmation

Principles of Global Security John D. Steinbruner, 2001-09-19 From the earliest human records warfare has been both an organizing focus and a prime source of political motivation Countless battles have been fought in the course of colonizing the planet and the experience has created a legacy of military confrontation that many people consider immutable Since preparations for war and the occasional conduct of it have been central preoccupations for virtually all the major states throughout time it is widely assumed that the pattern is rooted in human nature and will endure indefinitely But contemporary civilization is undergoing a monumental transformation affecting its most basic features The combined effects of information technology population dynamics and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction Correspondingly fundamental changes in the practice of war or what is now more politely called international security can be expected to follow *Principles of Global Security* anticipates the major implications of this massive transformation for security policy John D Steinbruner one of the nation's leading specialists on defense issues identifies formative problems and organizing principles relating to the predictable issues of security He examines in sequence how the configuration of nuclear and conventional forces might be affected how the problems of communal violence and dangers of technical proliferation might be managed and how security relationships among the major states might be altered One of the fundamental implications of globalization in a post cold war environment is a shift in security policy from deterrence to reassurance from active confrontation to cooperative engagement Without an opponent to justify preparation for large scale traditional missions nations must establish safer and less volatile patterns of deployment Maintaining global security in the twenty first century calls for a reconfiguration of basic relationships among historical opponents as well as revisions in military practices This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security
