[By John Murray III.] Seventh edition, corrected and enlarged* John Murray (Firm),1855      *The Body of the Cross* Travis E. Ables,2021-12-07 The Body of the Cross is a study of holy victims in Western Christian history and how the uses of their bodies in Christian thought led to the idea of the cross as a substitutionary sacrifice Since its first centuries Christianity has traded on the suffering of victims martyrs mystics and heretics as substitutes for the Christian social body These victims secured holiness either by their own sacred power or by their reprobation and rejection Just as their bodies were mediated in eucharistic social and Christological ways so too did the flesh of Jesus Christ become one of those holy substitutes But it was only late in Western history that he took on the function of the exemplary victim In tracing the story of this embodied development The Body of the Cross gives special attention to popular spirituality religious dissent and the writing of women throughout Christian history It examines the symbol of the cross as it functions in key moments throughout this history including the parting of the ways of Judaism and Christianity the gnostic debates martyr traditions and medieval affective devotion and heresy Finally in a Reformation era haunted by divine wrath these themes concentrated in the unique concept that Jesus Christ died on the cross to absorb divine punishment for sin a holy body and a rejected body in one      *The British Library General Catalogue of Printed Books to 1975* British Library (London),Jim Emmett,1979      *Rural Space in the Middle Ages and Early Modern Age* Albrecht Classen,2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already

for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic
