director The Fund Raising School The Center on Philanthropy at Indiana University Indianapolis Indiana     The Lifecycle of Trust in Education Kutsyuruba, Benjamin, Walker, Keith D., 2021-08-27 Understanding the dynamics of trust is an imperative undertaking for educational leaders In this book using an ecological perspective of the lifecycle the authors situate trust as an essential ingredient of school leaders moral agency and ethical decision making Based on their 15 years of research on trust in education the authors describe the nature and dimensions of trust its importance and imperative and its fragility and usefulness for school leaders positioning them as trust brokers in school organizations     Advancing Relational Leadership Research Mary Uhl-Bien, Sonia M. Ospina, 2012-10-01 Leaders and followers live in a relational world a world in which leadership occurs in complex webs of relationships and dynamically changing contexts Despite this our theories of leadership are grounded in assumptions of individuality and linear causality If we are to advance understandings of leadership that have more relevance to the world of practice we need to embed issues of relationality into leadership studies This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice Included are cutting edge thinking heated debate and passionate perspectives on the issues at hand The chapters reveal the varied and nuanced treatments of relationality that come from authors alternative paradigmatic entity constructionist critical views Dialogue scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape Using paradigm interplay they unpack assumptions and lay out a roadmap for relational leadership research A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives The book is aimed at those who feel that much of current leadership thinking is missing the boat in today s complex relational world It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership both those with much research exposure and those new to the field     The Jossey-Bass Handbook of Nonprofit Leadership and Management Robert D.
