**Cultural Histories of Ageing** Margery Vibe Skagen, 2021-05-12

Drawing on sixteenth to twenty first century American British French German Polish Norwegian and Russian literature and philosophy this collection teases out culturally specific conceptions of old age as well as subjective constructions of late life identity and selfhood The internationally known humanistic gerontologist Jan Baars the prominent historian of old age David Troyansky and the distinguished cultural historian and pioneer in the field of literature and science George Rousseau join a team of literary historians who trace out the interfaces between their chosen texts and the respective periods medical and gerontological knowledge The chapters in depth analyses of major and less known works demonstrate the rich potential of fiction poetry and autobiographical writing in the construction of a cultural history of senescence These literary examples not only bear witness to longue dur e representations of old age and epochal transitions regarding cultural attitudes to the aged they also foreground the subjectivities that produced some of these representations and that continue to communicate with readers of other times and places By casting a net over a variety of authors genres periods and languages the collection gives a broad sense of how literature is among the richest and most engaging sources for historicizing the ageing self **Many**

In the years of the Reagan Bush era the controversy over political correctness erupted on American campuses spreading to the mainstream media as right wing pundits like Dinesh D Souza and Roger Kimball prosecuted their publicity campaign against progressive academics Michael B rub s brilliant new book explains how and why the political correctness furor emerged and how the right s apparent stranglehold on popular opinion about the academy can be loosened Traversing the terrain of contemporary cultural criticism B rub examines the state of cultural studies the significance of postmodernism the

continuing debate over multicultural curricula and the recent revisions of literary history in American studies Also included is B rub s witty and self deprecating autobiographical reflection on why interpretive theory has emerged as an indispensable part of education in the humanities over the past decade Public Access insists that academics must exercise more responsibility towards the publics who underwrite but often misunderstand their work and its significance Taken seriously as a potential audience B rub argues such publics can be weaned from their present inclination to believe the distortions and half truths peddled by the right s ideologues The goal of such public access criticism is not just a better environment for teachers and scholars but a world in which education itself achieves its proper place in a society committed to equality of opportunity and true critical thinking

*The End of the Cognitive Empire* Boaventura de Sousa Santos,2018-07-16 In The End of the Cognitive Empire Boaventura de Sousa Santos further develops his concept of the epistemologies of the South in which he outlines a theoretical methodological and pedagogical framework for challenging the dominance of Eurocentric thought As a collection of knowledges born of and anchored in the experiences of marginalized peoples who actively resist capitalism colonialism and patriarchy epistemologies of the South represent those forms of knowledge that are generally discredited erased and ignored by dominant cultures of the global North Noting the declining efficacy of established social and political solutions to combat inequality and discrimination Santos suggests that global justice can only come about through an epistemological shift that guarantees cognitive justice Such a shift would create new alternative strategies for political mobilization and activism and give oppressed social groups the means through which to represent the world as their own and in their own terms

*Decentering Epistemologies and Challenging Privilege* Sophie Bourgault, Maggie FitzGerald, Fiona Robinson, 2024-09-13

Care ethics first emerged as an attempt to decenter ethics feminist scholars like Carol Gilligan argued that women's moral experiences were not reflected in the dominant masculinist approaches to ethics which were centered on a rational disembodied atomistic moral subject Care ethics challenged this model by positing ethics as relational contextualized embodied and realized through practices rather than principles Over the past decades many care ethics scholars have sought to further this project by considering care politically and epistemologically in relation to various intersecting hierarchies of power and knowledge This book advances this project by discussing the ways care ethics contributes to the decentering of dominant epistemologies and to the challenging of privilege and by considering how to decenter care ethics itself via an encounter with non Western philosophical traditions and alternative epistemologies Written by scholars from different countries disciplines and intellectual traditions the volume offers original care ethics contributions on epistemic injustice privileged irresponsibility ecofeminism settler colonialism social movements such as BLM and various racialized and gendered inequities tied to care work

**The Analytic Situation** Peter F. Drucker, 2017-07-05

Significant as has been the role of psychoanalysis and psychotherapy in contemporary culture and society its importance continues to grow at an accelerating rate as more specific focused and involving forms of therapy are devised The contributions of eminent practitioners that make up this volume deal with specific types of occurrences in the confrontation between patient and therapist such as silence crying sleeping touching use of first names gifts note taking termination etc The views expressed here demonstrate how the rigidity of early psychoanalytic theory has yielded to fundamental changes in the handling of the analytic situation numerous new schools of thought have arisen in attempts to give deeper fulfillment to the needs of patient analyst and society The persuasions of these new schools Gestaltist existentialist neo Freudian behaviorist ego psychologist rational emotive encounter and many others underlie the material presented here Impulsiveness and originality mark all of these departures from orthodoxy The therapist becoming more open and more manifestly responsive in his interaction with the patient is clearly shifting his role from that of an objective listener

and interpreter to that of an overt participant in therapy These trends are further intensified by the fact that the practice of psychotherapy is now carried on by a vast number of clinical psychologists personality psychologists social psychologists and social workers who have taken up psychotherapy as a professional activity in urban mental health clinics and in a variety of settings outside the major American metropolitan areas The Analytic Situation provides informative revealing reading for everyone involved in the psychotherapeutic process It also offers provocative insights to students and therapists in training
