Sex And Death:

Sex and Death Beverley Clack, 2002-11-01 For centuries people have debated the nature of the human self. Running beneath these various arguments lie three certainties: we are born, reproduce sexually, and die. The models of spirituality which dominate the Western tradition have claimed that it is possible to transcend these aspects of human physicality by ascribing to human beings alternative traits such as consciousness, mind, and reason. By locating the essence of human life outside its basic physical features, mortality itself has come to be viewed as a problem for it appears to render human life both meaningless and absurd. Complex connections have then been made between the key features of life: sex is linked with death, and birth becomes the event that introduces the child to the world of decay and ultimately to death itself. This fascinating book exposes the way in which the preoccupation with transcendence in both religious and secular thinking has distorted our sense of what it is to be human. At the same time, *Sex and Death* offers an alternative approach to the debate based on an acceptance of mortality that emphasizes the depth and profundity possible in human life. It is an argument which will be essential reading for students of philosophy or religion as well as the general reader interested in these debates.

Sex, death, secrets and lies Allis Childe, 2025-02-28 Without stress and trauma there would be no anxiety, depression, addictions, or self-harm. There would be fewer infections, cancers, aches, and pains. We would not comfort eat, buy things we didn't need, or self-medicate with alcohol and drugs. We would be satisfied with our lives and content in our relationships. The only lines on our face would be laughter lines. 100% of us experience stress, while 50% of us will also suffer trauma in our lifetime. Stress and trauma have the power to cause or exacerbate 90% of mental and physical illness, so we need to understand how to manage these fundamental issues. Hospitals are full of patients suffering from diseases of excess and neglect. But why do so many of us persist in doing things we shouldn't or knowingly neglect the things we should? Are we self-soothing to cope, or self-harming because we just don't care? Are stressful secrets at the root of all ills? This book explains the science of stress and trauma. It includes tools for the reader to measure their levels of stress and trauma and offers suggestions to help them on their way to recovery.

Sex, Death and Witchcraft Douglas Ezzy, 2014-05-22 Faunalia is a controversial Pagan festival with a reputation for being wild and emotionally intense. It lasts five days, 80 people attend, and the two main rituals run most of the night. In the tantalisingly erotic Baphomet rite, participants encounter a hermaphroditic deity, enter a state of trance, and dance naked around a bonfire. In the Underworld rite, participants role-play their own death, confronting grief and suffering. These rituals are understood as shadow work, a Jungian term that refers to practices that creatively engage repressed or hidden aspects of the self. *Sex, Death and Witchcraft* is a powerful application of relational theory to the study of religion and contemporary culture. It analyses Faunalia's rituals in terms of recent innovations in the sociology of religion and religious studies that focus on relational etiquette, lived religion, embodiment, and performance. The sensuous and emotionally intense ritual performances at Faunalia transform both moral orientations and self-understandings. Participants develop an

ethical practice that is individualistic but also relational and aesthetically mediated Extensive extracts from interviews describe the rituals in participants own words The book combines rich and evocative description of the rituals with careful analysis of the social processes that shape people s experiences at this controversial Pagan festival *Love, Sex, Death, and the Meaning of Life* Foster Hirsch,1981

Ian McEwan: Sex, Death, and History Eluned Summers-Bremner, 2014-05-28 Ian McEwan's works have always shown an interest in the question of how fiction operates This interest does not usually manifest on the formal level A few of the early stories aside his fictions are not formally experimental McEwan tends to opt for those reliable patternings of space time and narrative progression that enable readers to trust the authorial environment sufficiently to identify with characters and become invested to some extent in what happens to them Despite McEwan's commitment by and large to naturalistic means of telling a story his later novels also demonstrate a concern with opacity as characters often pursue courses of action for reasons that are unclear to them Equally often these actions bear some relation to the intrinsic opacity or enigma of one's sexual desires one's relation to one's mortality or one's relation to the actions of those human beings who have gone before one as this book will show It is this focus on enigma in McEwan's work whether sexual mortal or historical that lends it to a psychoanalytic reading such as the kind pursued in this book because for psychoanalysis there is no such thing as full access to one's self or to one's feelings or motivations Given that one's relation to history is also opaque in the sense that one grasps fully or imagines one grasps fully only those historical events which predate or otherwise excludes one this study seeks historical reasons for why McEwan sometimes blocks readerly identification with characters in the early fiction For these characters are also products of their environments environments which the characters relative opacity and unlikeability seems to offset and exaggerate or present in a manner showcased for one's judgment And in this way the characters environment is denaturalized to say the least This book reveals how all of these works explore to some extent the human tendency to act and feel in particular situations in profound contradistinction to how one might prefer to think one would This failure to coincide with one's image of how one would have expected or preferred to behave The Innocent's Leonard Marnham is not the cool experienced lover of his imaginings any more than Solar's Michael Beard is going to revamp his lifestyle or career produces instances of affective or imaginative excess troubling images or feelings that can often only be allayed or dealt with by a further failure to coincide with one's desires In this book author Eluned Summers Bremner shows that McEwan's interests in opacity not only become clear in significance and import but that his interests in human failure to coincide with one's views about the past and hopes for the future also appear as what they are an ongoing concern with how one relates to the complex operation of human history
