**Creative Subversions** Margot Francis, 2011-12-01 Creative Subversions explores how whiteness and Indigeneity are articulated through images of Canadian identity and the contradictory and contested meanings they evoke These benign even kitschy images she argues are haunted by ideas about race masculinity and sexuality that circulated during the formative years of Anglo Canadian nationhood In this richly illustrated book Margot Francis shows how national symbols such as the beaver the railway the wilderness of Banff National Park and ideas about Indianness evoke nostalgic versions of a past that cannot be expelled or assimilated Juxtaposing historical images with material by contemporary artists she investigates how artists are giving these taken for granted symbols new and suggestive meanings

**Removing the Margins** George Jerry Sefa Dei, 2000 Removing the Margins works to identify and challenge many of the cultural and systematic paradigms that perpetuate racism and other forms of oppression in mainstream schooling The authors pursue the ideal that education should not simply affirm the status quo but should produce knowledge for social action This philosophical and theoretical resource also moves beyond the study of educational failure to explore the new and creative ways schooling barriers have been confronted The focus is placed on the factors of representation family and community staff equity language integration and spirituality as fundamental to school reform Removing the Margins is the product of five years of research and writing in the search for best practices in inclusive education The authors address the philosophical and theoretical bases for inclusivity in this book while laying out the practical approach in the accompanying volume Inclusive Schooling A Teacher's Guide to Removing the Margins

*Retooling the Mind Factory* Alan Sears, 2003-01-01 Alan Sears examines education reform in relation to a broad process of cultural and economic change His book makes the case that education reform is one aspect of a broad ranging neo liberal agenda that aims to push the market deeper into every aspect of our lives by eliminating or shrinking non market alternatives The author begins by showing that advocates of education reform have had to make the case that the current system is not working This sets the ground for an examination of the so called Common Sense Revolution a claim that drastic change was required to redesign government policies to fit a changing world Lean production methods are a crucial component of this changing world and broader social and cultural change is now required to consolidate the emerging order built on the spread of these methods Education reform is designed to recast the relations of citizenship contributing to the cultural and social change promoted through the social policy of the lean state
