X-Ray Vision Richard M. Swiderski, 2012 X ray vision at first was the revival of the phantasmagoria and ground penetrating sight of earlier centuries attached to the new technology of X rays in the early twentieth century The image idea of the existence of rays that allow prepared eyes to see into clothing through walls and into the earth not feasible in fact generated fictions and surrogates of how living beings would experience such an ability what they would do with it and what it would do to them Expressing both a need and a desire X ray vision underwent its own development gathering elements of play inquiry and assault independent of X ray technology but converging with microscopy telescropy television and surveillance *Population Exposure to X-rays, U.S. 1970* National Center for Health Statistics (U.S.). Perversion Stephanie S. Swales,2012-08-21 Lacan's psychoanalytic take on what makes a pervert perverse is not the fact of habitually engaging in specific abnormal or transgressive sexual acts but of occupying a particular structural position in relation to the Other Perversion is one of Lacan's three main ontological diagnostic structures structures that indicate fundamentally different ways of solving the problems of alienation separation from the primary caregiver and castration or having limits set by the law on one's jouissance The perverse subject has undergone alienation but disavowed castration suffering from excessive jouissance and a core belief that the law and social norms are fraudulent at worst and weak at best In Perversion Stephanie Swales provides a close reading a qualitative hermeneutic reading of what Lacan said about perversion and its substructures i.e. fetishism voyeurism exhibitionism sadism and masochism Lacanian theory is carefully explained in accessible language and perversion is elucidated in terms of its etiology characteristics symptoms and fundamental fantasy Referring to sex offenders as a sample she offers clinicians a guide to making differential diagnoses between psychotic neurotic and perverse patients and provides a treatment model for working with perversion versus neurosis Two detailed qualitative clinical case studies are presented one of a neurotic sex offender and the other of a perverse sex offender highlighting crucial differences in the transference relation and subsequent treatment recommendations for both forensic and private practice contexts Perversion offers a fresh psychoanalytic approach to the subject and will be of great interest to scholars and clinicians in the fields of psychoanalysis psychology forensic science cultural studies and philosophy
