Mersky, 1994 **Modelling the Messerschmitt Bf 110** Brett Green, 2012-02-20 The Messerschmitt Bf 110 was undoubtedly one of the most significant aircraft of World War II Despite suffering setbacks in the summer of 1940 at the hands of the RAF it continued to be used effectively in other theatres and roles until the last days of the war particularly as a night fighter against RAF Bomber Command's strategic bombing campaign over the Reich This volume shows you how to correct and convert basic 1/48 scale kits of the Bf 110 into many different variants using a wide selection of aftermarket detail sets conversions accessories and decals for both day and night fighter schemes Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA Nigel Askey, 2013-11-01 Operation Barbarossa Volume IIA concerns the Wehrmacht All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I along with the contextual history An assessment of each weapon system's inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit's actual organisation and equipment All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units Landeschützen battalions and rail road and construction companies In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed **Me 210/410 Zerstörer Units** Robert Forsyth, 2019-11-28 Intended as a progressive development of the twin engined Bf 110 Zerstörer destroyer or heavy fighter the Me 210 first took to the air in September 1939 However due to a lack of sufficient flight testing before being declared service ready the Me 210 suffered from a less than satisfactory reputation in respect to its flight characteristics and weak undercarriage After enhancements were made to the fuselage and wings and the power of the plane was increased the Me 210 became the Me 410 in late 1942 By this stage of the war much was expected of the two types which were forced to fly in very dangerous skies over North Africa and in the defence of the German homeland Both aircraft were deployed as heavy fighters fighter bombers reconnaissance platforms and interceptors seeing service with a number of different units The Me 410 was fitted with 30 mm cannon 21 cm underwing mortars and the colossal 5 cm BK cannon that was intended to pack a punch against the USAAF's four engined bombers which threatened the Reich in large numbers from 1943 onwards In this title supported by contemporary photography and full colour artwork Robert Forsyth tells the complex story of the Me 210 and 410 detailing their development and assessing their capabilities as combat aircraft *The Canadian Army & Normandy*
