Lunar Perspectives:

Lunar Perspectives Michael H. Keefer, 1996 **New Views of the Moon** Bradley L. Jolliff, Mark A. Wieczorek, Charles K. Shearer, Clive R. Neal, 2018-12-17 Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience given the data sets provided by missions of the 1990s and lists remaining key questions as well as new ones for future exploration to address. It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information. The Moon is the only body other than Earth for which we have material samples of known geologic context for study. This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience thus allowing more efficient planning for the exploration of other worlds **Lunar Point of View** SM Tenneshaw, 2013-08-01 A pair of earthlings met with the Mocs natives of the moon to negotiate a contract but soon discover the Lunar Point of View is very different

Expanding Worldviews: Astrobiology, Big History and Cosmic Perspectives Ian Crawford, 2021-06-07 This book collates papers presented at two international conferences held at the Australian National University in 2018 and Birkbeck College London in 2019 exploring the relationships between big history and astrobiology and their wider implications for society. These two relatively new academic disciplines aim to integrate human history with the wider history of the universe and the search for life elsewhere. The book will show that despite differences in emphasis big history and astrobiology share much in common especially their interdisciplinary approaches and the cosmic and evolutionary perspectives that they both engender. Specifically the book addresses the unified all embracing nature of knowledge the impact of big history on humanity and the world at large the possible impact of SETI on astrobiology and big history the cultural signature of Earth's inhabitants beyond our own planet and the political implications of a planetary worldview. The principal readership is envisaged to comprise scholars working in the fields of astrobiology big history and space exploration interested in forging interdisciplinary links between these diverse topics together with educators and a wider public interested in the societal implications of the cosmic and evolutionary perspectives engendered by research in these fields

Heaven, Earth, & Humankind: Three Spheres, Three Light Cycles, Three Modes William M. Wadsworth, 2015-05-22 The aim of this book is to map some of the deep structural and interpretive functions of the three modes for astrology By first making inferences from ancient writings then analyzing the correlations of the modes it will be argued that the modes are vital to an understanding of human behavior They anticipate a persons level of functioning or in other words their governing meme In traditional systems modes define three basic levels of human functioning the intellectual social and biological Properly understood these human imperatives provide psychological insight into the interpretive meaning of sun moon ascendant and planets The associative values ascribed to the modes derive from their corresponding direct relations to the planes of the ecliptic equator and the horizon Consequently it is within astrological technology that this essay contends that the modes help interpret the sun moon and ascendant in a natal chart whose meaning also is measured by these same three planes
