The New Year in Vienna of 1783 was clearly a hectic time for Mozart and his bride Constantine whom he had married the previous August. In a letter of January 4th 1783 to his father he describes something of his activities and excuses himself for not sending New Year wishes. He apologises, too, for not keeping a promise which he had made "in his heart of hearts" before his marriage and, as proof of his good intentions describes "the score of half a mass which is still lying here waiting to be finished". It was surely he doubted that the Mass he refers to is the one in C minor, KV.427; perhaps his greatest and most deeply felt work for the Church. Sadly, it has remained incomplete, and Mozart eventually used the music he had written for a Cantata *Devilish Pentecost*, which he had put together in 1783 for the benefit of the *Tischbrotgesellschaft* in Vienna. The Cantata debases the music from its original lofty intent in being set to inferior texts and it is perhaps best forgotten, for in its adaptation nothing is added to our knowledge of the original music.

It has always, and not unreasonably, been assumed that the promise Mozart had, in January 1783, so far failed to keep was of a Mass to celebrate his union with Constantine. And a Mass was almost certainly performed on August 25th that year in Salzburg in which Constantine sang as a soloist. She herself refers to it in a letter to the publisher Andri in 1800 in which he tries to deal with contracts and the disposal of Mozart's unpublished manuscripts. She was a good deal harassed by the various pressures brought to bear on her, and in dealing with the list of Andri's enquiries makes many mistakes about them. Her comments on "the Mass that was afterwards used for *Devilish Pentecost*" do little to elucidate clearly the two main questions that are still being asked: did Mozart complete the Mass and was the music we have of it really intended as a wedding tribute to Constantine? "For the mass that was afterwards used for *Devilish Pentecost* you should make enquiries in Salzburg, where it was composed, or at any rate performed. Mozart certainly did not make use of the concluding section of this mass in his *Requiem*. When he was composing the 'mass', there was no mention of the *Requiem*, which is a much later work."

The manuscript as Andri found it contained the Kyrie, the Gloria, the Sanctus (where parts for double chorus were incomplete) and the *Benedictus*. Of the Credo, only the Credo in *sanctum Deum* and the *Incoronatus* survive with some sad omissions in the way of string parts of the latter and some missing wind and inner string parts of the former. These have been newly completed for this recording.

It is extremely unlikely that it was played in Salzburg, or anywhere else. The incomplete nature of Andri's

publication—and the fact that no other relevant music appears in *Devilish Pentecost*—would seem to imply that the work was never finished.

Implicit in this suggestion is that the Mass performed in Salzburg in 1783 was an earlier complete one and that Constantine's memory (once more played but false). She was not, in any event, very clear about where the mass performed there was written, and it is odd that were it the completed C minor Mass, or indeed any mass whose origin lay in her marriage, that she should have made no reference to its supposed connections with her.

To revert to the original letter of 1783, it should be noted that Mozart nowhere directly refers to the work lying unfinished on his desk as a tribute to his wife. He does refer to what must have been a strong rebuke for dilatoriness from his father in the paragraph "It is quite true about my moral obligations and indeed I let the word flow from my pen on purpose. I made the promise from my heart of hearts and hope to be able to keep it. When I made it my wife was not yet married, yet as I was absolutely determined to marry her after her recovery it was easy for me to make it—but as this yourself was aware, time and other circumstances made our journey impossible. The score of half a mass which is still lying here waiting to be finished is the best proof that I really made the promise."

The promise, it seems to me, is more likely to have been one made to his father, and the delayed journey to which he refers was originally intended to bring the finished work on a visit to Salzburg which, owing to the marriage, was postponed.

It is also highly unlikely that Leopold Mozart would have delivered what must have been a sharp reminder to his son of that promise had it been only for a work for Constantine. Leopold was consistently against the marriage and disapproved of it for quite some time after it had been celebrated.

The strongest reason for disinclination to believe that KV.427 was intended as Mozart's offering to his bride seems to me to lie in the music itself. The opening Kyrie *Eleison* breathes a noble, tragic spirit in which there is little or no happiness to be found; and the Gloria *Eleison* has an unearthly spiritual beauty more radiant of a beloved soul in Paradise than a tribute to earthly love. All the rest of the music that has survived has that same transcendental quality: the grand pomp of the Gloria which plumbs the depths in the *Qui tollis* and the heights in the *Dominus Deus*; the grim rhythmic opening of the Credo, and even the revelling *Et incarnatus* doubtless written with Constantine

in mind as soloist; the lofty *Sanctus*, the earnest *Chorus* and solemn *Benedictus* all seem to speak of another purpose.

I wonder if it could have been a promise of a Mass in memory of his much loved mother who died in 1778, four years before the promise was made, which Leopold may have wanted to have performed in Salzburg. This of course is pure conjecture but it, or some similar purpose, would seem to provide a more fitting reason for such music.

Monoclonal Antibodies and Immune Checkpoint Inhibitors in the treatment of Cancer Prakash Radhakrishnan, Cory L. Brooks, Murali M. Yallapu, 2025-01-13 Cancer is a complex disease that can evade the immune system's natural defenses. However, recent advancements in immunotherapy have revolutionized cancer treatment by using the body's own immune system to fight cancer. Monoclonal antibodies (mAbs) and immune checkpoint inhibitors are two types of immunotherapy that have shown promise in treating various types of cancer. Monoclonal antibodies are laboratory-produced antibodies that are designed to recognize and target specific proteins on the surface of cancer cells. These antibodies can be used alone or in combination with other therapies such as chemotherapy or radiation. Monoclonal antibodies work by binding to cancer cells and blocking their ability to grow and divide or by marking them for destruction by the immune system. For example, trastuzumab (Herceptin) is a monoclonal antibody that targets HER2-positive breast cancer cells and can be used in combination with chemotherapy to improve survival rates.

Pathak, Simon Benita, 2012-05-15 This book covers various aspects of antibody-mediated drug delivery systems: theoretical aspects, processing, viral and non-viral vectors, and fields where these systems find and/or are being evaluated for applications as therapeutics and diagnostic treatment. Chapters discuss actual applications of techniques used for formulation and characterization. Applications areas include cancer, pulmonary, ocular diseases, brain drug delivery, and vaccine delivery. The contributing authors represent over 10 different countries covering recent developments happening around the globe.

Mendelian Inheritance in Man Victor A. McKusick, 1998-06-29 The twelfth edition of this classic reference work includes more than 2,000 new entries. A total of more than 9,000 entries. New features and enhancement of the familiar old features. Mapping information on more than 4,000 genes of known function. Information on specific point mutations responsible for more than 700 genetic disorders or neoplasms. Mendelian Inheritance in Man (MIM) is a genetic knowledgebase that serves clinical medicine and biomedical research, including the Human Genome Project. It aims to be comprehensive, not only complete but also collated, integrated, and interpreted; authoritative, not only accurate but also sound in its interpretations and judgements; and timely, not only up to date but also historically dimensioned. From a review of the eleventh edition, *Reproductive Toxicology*. Even the convenience of computer-based forms of MIM cannot eliminate the need for MIM in book form. The preface provides a wonderful synopsis of human genetics. The information contained in this text serves as a concise review for those with a genetics background. From a review of the tenth edition, *New England Journal of Medicine*. Victor McKusick has been for all these years the shepherd of the development of the field of clinical genetics. Perhaps his most important pragmatic achievement has been the 10 editions of *Mendelian Inheritance in Man*, which rapidly became and has remained the principal source of information on inherited diseases for all clinical geneticists. In addition to

the erudite entries in the books the references given with each description represent a magnificent bibliography of clinical genetics With McKusick's leadership and continued interest in gene mapping the book also represents an important compendium of the location of genes on specific chromosomes The book is a magnificent security blanket for the clinical geneticist and should be in the libraries not only of these specialists but also of all others who see patients with diseases that have genetic components
