This book comprises a collection of essays on economic development **The Economic Development of France and Germany 1815-1914** John Harold Clapham,1955 **The Machinery Question and the Making of Political Economy 1815-1848** Maxine Berg,1982-02-04 Dr Berg argues that technical change was one of the foremost theoretical concerns of Ricardo and his successors and the foundation for their distinctly optimistic view of the future She shows how the Machinery Question fostered the social conditions in which the status of Political Economy as a discipline was established and concludes that by the 1840s the divisions over machinery were firmly embedded in the great rival creeds of the future liberalism and socialism *The Economic Development of Continental Europe 1780-1870 (Routledge Revivals)* Alan Milward,S. B. Saul,2013-05-13 Upon its initial publication in 1973 this was the first textbook to present a unified view and comprehensive treatment of the economic development of Europe from a continental rather than a British perspective At the same time it is more than mere textbook it is an interpretive analysis of a wide range of research on the subject in many countries which explores the objective validity of earlier theories and provides an ideal starting point for further research into economic development and European history The work deals mainly with Western Europe but in principally studying both France and Germany up to 1870 the authors by no means neglect the smaller countries Indeed the work is unusual in dealing fully with the Scandinavian countries and others such as Switzerland and Belgium This is a reissue of the fully revised and corrected second edition of the work first published in 1979 **Soviet Union** Theodore E. Kyriak,1966 *Cumulative Index to Foreign Production and Commercial Reports* United States.
