Why does 1919 deserve further study and debate a hundred years later? What lessons for global history may we learn from the world order created at the end of the Great War? Drawing insight from the global turn of the past several decades that has forced us to reconsider the most important world events and processes since the French Revolution and especially the growing interest in World War I as a global conflict that extended far beyond the borders of Europe, this volume explores the global political ramifications of the treaties prepared at the Paris Peace Conference in 1919 by focusing on key topics: how the Paris Peace Conference reshaped the geopolitical configurations of the Middle East; the importance of transformations in Asia and particularly China in the immediate postwar period; the shifts in Southeastern Europe; new feminist movements in Central Europe; and the pre-history of neoliberalism. Read together, the papers demonstrate how the peace treaties signed in 1919 and 1920 marked a profound transformation on local, national, continental, and global scales.
