

ATSUKO MOROZUMI

A vibrant illustration of a young boy with blonde hair, wearing a red and white striped shirt and blue shorts, riding a large grey gorilla. The gorilla is climbing a thick tree branch, reaching upwards with its right arm. The background is a lush green jungle with a blue sky and white clouds. In the bottom right corner, there is a small woven basket and a small black and white grid pattern.

Forest and Stream ,1909 **The Alignment Problem** Brian Christian,2020-10-06 If you re going to read one book on artificial intelligence this is the one Stephen Marche New York Times A jaw dropping exploration of everything that goes wrong when we build AI systems and the movement to fix them Today s machine learning systems trained by data are so effective that we ve invited them to see and hear for us and to make decisions on our behalf But alarm bells are ringing Recent years have seen an eruption of concern as the field of machine learning advances When the systems we attempt to teach will not in the end do what we want or what we expect ethical and potentially existential risks emerge Researchers call this the alignment problem Systems cull r sum s until years later we discover that they have inherent gender biases Algorithms decide bail and parole and appear to assess Black and White defendants differently We can no longer assume that our mortgage application or even our medical tests will be seen by human eyes And as autonomous vehicles share our streets we are increasingly putting our lives in their hands The mathematical and computational models driving these changes range in complexity from something that can fit on a spreadsheet to a complex system that might credibly be called artificial intelligence They are steadily replacing both human judgment and explicitly programmed software In best selling author Brian Christian s riveting account we meet the alignment problem s first responders and learn their ambitious plan to solve it before our hands are completely off the wheel In a masterful blend of history and on the ground reporting Christian traces the explosive growth in the field of machine learning and surveys its current sprawling frontier Readers encounter a discipline finding its legs amid exhilarating and sometimes terrifying progress Whether they and we succeed or fail in solving the alignment problem will be a defining human story The Alignment Problem offers an unflinching reckoning with humanity s biases and blind spots our own unstated assumptions and often contradictory goals A dazzlingly interdisciplinary work it takes a hard look not only at our technology but at our culture and finds a story by turns harrowing and hopeful Into the Unknown Michael P. Ghiglieri,2024-09-15 Veteran wilderness guide Michael P Ghiglieri takes you into the unknown among white water rapids crocodiles hippos gorillas lions and impossible waterfalls His riveting memoir not only serves up true high adventure it also presents the ecology natural history conservation or the lack of it and exploration history of nine far flung wilderness regions across the globe including the never to be repeated white water run on the Colorado River through the Grand Canyon during the Bureau of Reclamation s 1983 super flood of ninety seven thousand cubic feet per second the first summit to sea descent of the Alas River exploring Sumatra s new Gunung Leuser National Park a last redoubt for wild orangutans and other rare species and the impossible run of the Alsek River from the Yukon to Alaska in the world s largest international conservation area Into the Unknown reveals what the natural world looks like through a professional s eyes during adventure travel when things start sliding toward the edge This insider memoir recounts ten sagas of extreme expeditions into Earth s most amazing wilderness regions to illustrate their realities science allure history risks to life and limb and ultimate fates Many of these regions have now vanished to progress Others are imperiled Only a few are protected
