

VISION

BY JESSIE B. RITTENHOUSE

I came to the mountains for beauty
And I find here the toiling folk,
On sparse little farms in the valleys,
Wearing their days like a yoke.

White clouds fill the valleys at morning,
They are round as great billows at sea,
And roll themselves up to the hill-tops
Still round as great billows can be.

The mists fill the valleys at evening,
They are blue as the smoke in the fall,
And spread all the hills with a tenuous scarf
That touches the hills not at all.

These lone folk have looked on them daily,
Yet I see in their faces no light.
Oh, how can I show them the mountains
That are round them by day and by night?

My Home Is The Mountains Who Am I Little Natures:

The Nature of Home Greta Gaard, 2018-02-15 As long as humans have been around we've had to move in order to survive. So arises that most universal and elemental human longing for home and so begins Greta Gaard's exploration of just precisely what it means to be at home in the world. Gaard journeys through the deserts of southern California through the High Sierras the Wind River Mountains and the Northern Cascades through the wildlands and waterways of Washington and Minnesota through snow season rain season mud season and lilac season yet her essays transcend mere description of natural beauty to investigate the interplay between place and identity. Gaard examines the earliest environments of childhood and the relocations of adulthood expanding the feminist insight that identity is formed through relationships to include relationships to place. Home becomes not a static noun but an active verb the process of cultivating the connections with place and people that shape who we become. Striving to create a sense of home Gaard involves herself socially culturally and ecologically within her communities discovering that as she works to change her environment her environment changes her. As Gaard investigates environmental concerns such as water quality oil spills or logging she touches on their parallels to community issues such as racism classism and sexism uncovering the dynamic interaction by which humans like other life on earth both shape and are shaped by our environments. While maintaining an understanding of the complex systems and structures that govern communities and environments Gaard's writing delves deeper to reveal the experiences and realities we displace through euphemisms or stereotypes presenting issues such as homelessness or hunger with compelling honesty and sensitivity. Gaard's essays form a quest narrative expressing the process of letting go that is an inherent part of an impermanent life. And when a person is broken in the aftermath of that letting go it is a place that holds the pieces together. As long as we are forced to move by economics by war by colonialism the strategies we possess to make and redefine home are imperative to our survival and vital in the shaping of our very identities. [Children's Books from Other Countries](#) Carl M. Tomlinson, 1998-01-15 Every child is entranced by the magic of story regardless of national boundaries. Many of the most memorable childhood stories have their origins in other countries. Exposing children to this multi-national body of literature introduces them to the great diversity of people and cultures that populate the world at a young age enabling them to become more thoughtful and generous individuals. *Children's Books from Other Countries* is a complete and current guide to international children's literature. The concept of a bibliography of international children's literature is not new. In the past many books have accomplished this task. The last two decades however have not yet produced a current reference source devoted to international children's books. *Children's Books from Other Countries* wonderfully rectifies this lack of attention. An introductory essay provides an overview of the field including a discussion on the rationale of sharing international books with children a brief history of the children's literature movement related books and awards and basic information about the International Board on Books for Young People (IBBY) and its American branch the United States Board on Books for Young

People USBBY An annotated bibliography contains over 700 titles from 29 different countries printed between 1950 and 1996 All titles are available in English many have been translated and others have originated in other English speaking countries The titles are organized by genre and have been selected for their high quality They are primarily targeted for children ages 0 14 although a few outstanding young adult titles are included Winners of the Mildred Batchelder Award and the Hans Christian Andersen Medal are listed in the appendix Indexes include Author Title Index Country of Origin Index and Subject Index Affordable and readable this timely resource is certainly a must for librarians and teachers and other professionals working with children Sponsored by the United State

The Treasures of American Nature John

Muir, 2022-11-13 In *The Treasures of American Nature* John Muir eloquently captures the majestic landscapes and rich biodiversity of America melding deep observational detail with impassioned prose that resonates with the spirit of the early conservation movement. Muir's writing transcends mere description; it is imbued with a philosophical grounding that reflects the interconnectedness of all living things and the profound beauty of the natural world. This work, composed in the late 19th century, encompasses themes of environmental stewardship and the transcendentalist influences that permeated Muir's early immersions in nature, making it a cornerstone of American nature writing and an essential text for understanding the nascent conservation ethos of the era. John Muir, often referred to as the Father of the National Parks, was profoundly influenced by his own extensive explorations of the American wilderness. His experiences as a naturalist and a writer stem from a life dedicated to understanding and preserving the beauty of the natural world, navigating through vast landscapes from the Sierra Nevada to the coastal shores of California. Muir's scientific curiosity and spiritual connection to nature propelled him to advocate for its preservation, paving the way for the environmental movements that followed. Readers with an interest in environmentalism, nature writing, or American history will find *The Treasures of American Nature* to be an indispensable treasure in itself. Muir's lyrical descriptions and fervent advocacy inspire a deeper appreciation for the planet, urging one to engage with nature not just as a backdrop for human life but as a vital participant in our shared existence. This book is a call to resonate with the wilderness within us all.
