Radiation Effects On Polymers For Biological Use:

Radiation Effects on Polymers for Biological Use Henning Kausch, 2003-07-03 Biomaterials repair reinforce or replace damaged functional parts of the human body All mechanical and biological interactions between an implant and the body occur across the interface which has to correspond as nearly as possible to its particular function Much of the progress in adapting polymer materials for use in a biological environment has been obtained through irradiation techniques For this reason the most recent developments in four key areas are reviewed in this special volume 1 the analysis of the topology and the elemental composition of a functional surface 2 the chemical modification of the surface which results in highly pure sterile and versatile surfaces 3 the sterilisation of implantable devices via ionising radiation and its possible effects on the structural mechanical properties of polymers and 4 the radiation effects on living cells and tissues which are of particular importance for radiation protection and radiotherapy Carraher's Polymer Chemistry Charles E. Carraher Jr., 2017-10-12 Carraher's Polymer Chemistry Tenth Edition integrates the core areas of polymer science Along with updating of each chapter newly added content reflects the growing applications in Biochemistry Biomaterials and Sustainable Industries Providing a user friendly approach to the world of polymeric materials the book allows students to integrate their chemical knowledge and establish a connection between fundamental and applied chemical information It contains all of the elements of an introductory text with synthesis property application and characterization Special sections in each chapter contain definitions learning objectives questions case studies and additional reading **Carraher's Polymer Chemistry, Ninth Edition** Charles E.
