Lu, Luther W. Brady, 2011-04-29 Decision Making in Radiation Oncology is a reference book designed to enable radiation oncologists including those in training to make diagnostic and treatment decisions effectively and efficiently The design is based on the belief that a picture is worth a thousand words Knowledge is conveyed through an illustrative approach using algorithms schemas graphics and tables Detailed guidelines are provided for multidisciplinary cancer management and radiation therapy techniques In addition to the attention riveting algorithms for diagnosis and treatment strategies for the management of disease at individual stages are detailed for all the commonly diagnosed malignancies Clinical trials that have yielded gold standard treatment and their results are documented in the schemas Moreover radiation techniques including treatment planning and delivery are presented in an illustrative way This

groundbreaking publication is an essential tool for physicians in their daily clinical practice

Decision Tools for Radiation Oncology Carsten Nieder, Laurie E. Gaspar, 2014-03-13 A look at the recent oncology literature or a search of the common databases reveals a steadily increasing number of nomograms and other prognostic models. These models may predict the risk of relapse, lymphatic spread of a given malignancy, toxicity, survival, etc. Pathology information, gene signatures, and clinical data may all be used to compute the models. This trend reflects increasingly individualized treatment concepts, the need for approaches that achieve a favorable balance between effectiveness and side effects, and the goal of optimal resource utilization reflecting prognostic knowledge. In order to avoid misuse, it is important to understand the limits and caveats of prognostic and predictive models. This book provides a comprehensive overview of such decision tools for radiation oncology, stratified by disease site, which will enable readers to make informed choices in daily clinical practice and to critically follow the future development of new tools in the field.

Cancer and its Management Jeffrey S. Tobias, Daniel Hochhauser, 2013-05-20 Now in its sixth edition, this highly regarded book is designed as an introductory text on the principles of diagnosis, staging, and treatment of tumours. The new edition includes up-to-date information on the most recent techniques and therapies available. Emphasises the importance of multidisciplinary teamwork in the care of cancer patients. Highlights frequent dilemmas and difficulties encountered during cancer management. Features the important contributions of a new author, Professor Daniel Hochhauser. Contains a brand new two-colour design. As with previous editions, the first part of the book is devoted to the mechanisms of tumour development and cancer treatment. This is followed by a systematic account of the current management of individual major cancers. For each tumour, there are details of the pathology, mode of spread, clinical presentation, staging, and treatment with radiotherapy and chemotherapy. This accessible and practical resource will be invaluable to trainees in oncology, palliative care, and general medicine, as well as specialist nurses, general practitioners, medical students, and professions allied to medicine. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

The Washington Manual Hematology and Oncology Subspecialty Consult Giancarlo Pillot, Marcia Chantler, 2004 This handbook is a practical guide to the diagnosis and treatment of hematologic disorders and adult malignancies. Coverage includes both symptom-oriented and disease-oriented management strategies and both acute and chronic problems. The authors discuss the major clinical manifestations and usual management options for each disease entity. Each chapter ends with a list of key points to remember and includes current references.

Decision Making in Radiation Oncology Jiade J. Lu, Luther W. Brady, 2010-11-22 Decision Making in Radiation Oncology is a reference book designed to enable radiation oncologists, including those in training, to make diagnostic and treatment decisions effectively and efficiently.
