Radical Heroes Gramsci Freire And The Politics Of Adult Education:

Radical Heroes Diana Coben, 2013-10-08 First Published in 1998 This book examines the ideas of two of the most controversial radical heroes of adult education Antonio Gramsci and Paulo Freire gauging their significance for the development of a radical politics of adult education in the post Soviet post apartheid new world order Gramsci offers a noble vision of the role of adult education in the creation of revolutionary Marxist hegemony but the cause he lived and died for has all but collapsed Nevertheless his distinction between common sense and good sense his theory of the intellectual and his concept of hegemony bear scrutiny today In Freire's pedagogy of the oppressed the relationship between leader and followed teacher and student is problematic and this book questions whether his pedagogy has the liberating potential he envisioned The author considers and rejects the linkage of Gramsci's and Freire's ideas in the adult education literature Nonetheless Gramsci and Freire have huge symbolic importance as radical heroes in an under theorized and marginalised field The study highlights a problem with the radical hero phenomenon when individuals become icons their ideas cease to be open and new insights do not emerge as challenge becomes inadmissible and debate dies While neither Gramsci nor Freire can provide us with answers Gramsci helps us address the difficult questions of purpose and content in the politics of adult education

Critical Theories, Radical Pedagogies, and Global Conflicts Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book s contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism *Critical Theories Radical Pedagogies and Global Conflicts* draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible **Teaching Adults** Rogers, Alan, Horrocks, Naomi, 2010-06-01 *Teaching Adults Adult*

Perspectives on Adults Learning Mathematics D. Coben,J. O'Donoghue,Gail E. FitzSimons,2006-05-10 At a time when the importance of lifelong education is becoming recognised around the world this is the first book to explore an important but hitherto neglected area adult mathematics education This book is about adults learning mathematics wherever and in whatever circumstances they do so It brings together researchers in the field and aims to lay the foundations for study and further research and practice in this fast developing area It aims to situate research and practice in adults learning mathematics within the wider field of lifelong learning and lifelong education and to be accessible both to the specialist and to the general adult reader The book features a comprehensive review of the field which sets the scene for sections on Perspectives on Research on Adults Learning Mathematics Adults Mathematics Culture and Society Adults Mathematics and Work and Perspectives in Teaching Adults Mathematics Topics covered include mathematics and common sense statistical literacy and numeracy new theories on learning mathematics mathematical competences for the workplace ethnomathematics and the training of tutors Grateful Nation Ellen Moore,2017-10-26 In today s volunteer military many recruits enlist for the educational benefits yet a significant number of veterans struggle in the classroom and many drop out The difficulties faced by student veterans have been attributed to various factors poor academic preparation PTSD and other postwar ailments and allegedly antimilitary sentiments on college campuses In Grateful Nation Ellen Moore challenges these narratives by tracing the experiences of

Iraq and Afghanistan war veterans at two California college campuses Drawing on interviews with dozens of veterans classroom observations and assessments of the work of veteran support organizations Moore finds that veterans academic struggles result from their military training and combat experience which complicate their ability to function in civilian schools While there is little evidence of antimilitary bias on college campuses Moore demonstrates the ways in which college programs that conflate support for veterans with support for the institutional military lead to suppression of campus debate about the wars discourage antiwar activism and encourage a growing militarization Medici Women Jennifer

Sumner, Gabrielle Langdon, 2006-01-01 Sustainability and the Civil Commons moves beyond rural roots to build a comprehensive understanding of sustainability that combines global reach with local focus **Understanding the Adult**

Learner Alisa Belzer, Brian Dashew, 2023-07-03 Adults seek out learning for very different reasons in different contexts and this book is intended to support adult educators development in responding to this rich array There is no single way to be an adult learner and so it should not be surprising that there is no single way to be an adult educator However the authors believe that all educators must demonstrate a commitment to meeting adult learners where they are Adult educators should help learners move forward not only with new content knowledge information and skills but also with new ways of making meaning and seeing themselves their role and the world This volume introduces many theories and concepts that can help adult educators do this effectively **The Critical Turn in Education** Isaac Gottesman, 2016-03-17

The Critical Turn in Education traces the historical emergence and development of critical theories in the field of education from the introduction of Marxist and other radical social theories in the 1960s to the contemporary critical landscape The book begins by tracing the first waves of critical scholarship in the field through a close contextual study of the intellectual and political projects of several core figures including Paulo Freire Samuel Bowles and Herbert Gintis Michael Apple and Henry Giroux Later chapters offer a discussion of feminist critiques the influx of postmodernist and poststructuralist ideas in education and critical theories of race While grounded in U S scholarship The Critical Turn in Education contextualizes the development of critical ideas and political projects within a larger international history and charts the ongoing theoretical debates that seek to explain the relationship between school and society Today much of the language of this critical turn has now become commonplace words such as hegemony ideology and the term critical itself but by providing a historical analysis The Critical Turn in Education illuminates the complexity and nuance of these theoretical tools which offer ways of understanding the intersections between individual identities and structural forces in an attempt to engage and overturn social injustice

Non-Formal Education Alan Rogers, 2005-04-04 This is the first full study of non formal education on an international scale since the 1980s The book describes the emergence of the concept in the context of development and educational reform It traces the debate about non formal education from its origins in 1968 to the mid 1980s and looks at the issues that this debate raised It then describes a number of programmes in different parts of the world which call themselves non formal

pointing out the wide range of different views about what is and what is not non formal Rogers asks whether we should drop the term altogether or try to reconceptualise it in terms of flexible schooling or participatory education This is an important new book by a well established author It deals with complex issues but is written in a clear style It contains an important new analysis of the development paradigms in which the controversies surrounding non formal education grew up and which shaped its purpose and impacts The author s call for a reformulation of the concept will find echoes not only in developing societies but also in Western circles where the language of non formal education is being used increasingly within the context of lifelong learning The book grew out of the teaching of non formal education in which Professor Rogers has been engaged for the last 20 years It is intended for teachers and students in comparative education courses in higher education institutions and for researchers and others with an interest in the field
