Digital switchover of television and radio in the United Kingdom Great Britain: Parliament: House of Lords: Select Committee on Communications, 2010-03-29 The Committee warns of a major public reaction against radio digital switchover scheduled for 2015 unless the Government make the case for switchover and keep the public informed about its impact There is public confusion and industry uncertainty over radio switchover and concern that due to the lack of public information people are still buying analogue radios which will be out of date in a few years time Retailers gave evidence stating that they are not getting adequate information on switchover plans so are unable to offer consumers accurate guidance when making purchases The report also points out that car manufacturers are still fitting analogue radios in new cars and digital radios will not be fitted as standard in all cars until 2013 The radio switchover is contrasted with the television switchover programme finding that the benefits of TV switchover were well understood in contrast surveys show that the public are generally happy with the present FM radio system and with the range of programmes that are provided The Committee recommends urgent steps on a range of actions including providing a detailed plan for universal digital radio coverage including how it is to be funded developing a policy for the long term use of FM devising a help scheme for radio switchover financed by general taxation rather than the BBC licence fee ensuring new digital car radios are fitted with a multi standard chip to enable their use overseas encouraging radio manufacturers and retailers to devise a sensible scrappage scheme for redundant analogue radios It is also noted that the BBC and Government disagree over whether the cost of universal digital coverage of their national stations can be met under the current licence fee The report says that it is essential that a firm and unambiguous plan for funding the completion of build out of the digital radio service is put in place as soon as possible The report concludes reversing current policy would be unproductive given the amount of investment in digital radio already and while the switchover in 2015 is ambitious a change of target date is not favoured at this stage

Radio's Digital Dilemma John Nathan Anderson, 2013-12-04 Radio's Digital Dilemma is the first comprehensive analysis of the United States digital radio transition chronicling the technological and policy development of the HD Radio broadcast standard A story laced with anxiety ignorance and hubris the evolution of HD Radio pitted the nation's largest commercial and public broadcasters against the rest of the radio industry and the listening public in a pitched battle over defining the digital future of the medium The Federal Communications Commission has elected to put its faith in marketplace forces to govern radio's digital transition but this has not been a winning strategy a dozen years from its rollout the state of HD Radio is one of dangerous malaise especially as newer digital audio distribution technologies fundamentally redefine the public identity of radio itself Ultimately Radio's Digital Dilemma is a cautionary tale about the overarching influence of economics on contemporary media policymaking to the detriment of notions such as

public ownership and access to the airwaves and a call for media scholars and reformers to engage in the continuing struggle of radio's digital transition in hopes of reclaiming these important principles
