Programming National Identity Joelle Neulander, 2009-12-01 Radio provided a new and powerful medium in 1930s France Devoted audiences responded avidly to their stations programming and relied on radio as a source of daily entertainment news and other information Within the comfortable secure space of the home audio culture

reigned supreme In *Programming National Identity* Joelle Neulander examines the rise of radio as a principal form of mass culture in interwar France exploring the intricate relationship between radio gender and consumer culture She shows that while entertaining in nature and narrative in structure French radio programming was grounded in a politically and socially conservative ideal In the early years of radio France was the only Western nation apart from Australia to have both private and public radio stations Commercial station owners created audiences and markets from a scattered group of radio enthusiasts relying on traditional ideas about French identity family and community ties Meanwhile the government run stations tried to hew an impossible compromise balancing the nonpolitical entertainment that listeners desired with educational programs that supported state over private interests As a public medium operating in a private space radio could potentially cross normal gender and social boundaries Programmers responded Neulander shows by restricting broadcast content airing only programs deemed appropriate for a proper French home Accordingly radio culture espoused normative gender roles and traditional notions of the family Neulander analyzes radio program schedules and content including plays and songs and explains how programmers governments station owners and average citizens fought over what was aired On French radio she shows the best families had working fathers homemaking mothers and money in the bank Indeed for radio characters bourgeois stability proved a prerequisite for happiness and characters who did not fit the ideal often served as bad examples Although the left wing Popular Front controlled the French government during the late 1930s both public and private radio portrayed the working class negatively usually as buffoons or criminal characters Indeed Maurice Chevalier better known today for his film career first cultivated his working class playboy image on 1930s radio and legendary radio artist Edith Piaf rose to fame singing tragic tales of prostitutes Neulander also examines French radio's ambivalent stance toward the colonial world featured in so many plays and songs The colonies represented a perceived threat to the traditional French patriarchal family and home so broadcasters stereotyped them as alien often perilous spaces Yet love songs by French perceived exotic types like Tino Rossi proved wildly popular The first work in English about interwar French radio *Programming National Identity* reveals the persistence of conservative notions of family and nation that challenged the failing liberal democracy of the Popular Front at the end of the Third Republic

Media, Sound, and Culture in Latin America and the Caribbean Alejandra Bronfman, Andrew Grant Wood, 2012-04-22 Outside of music, the importance of sound and listening have been greatly overlooked in Latin American history. Visual media has dominated cultural studies, affording an incomplete record of the modern era. This edited volume presents an original analysis of the role of sound in Latin American and Caribbean societies from the late nineteenth century to the present. The contributors examine the importance of sound in the purveyance of power, gender roles, race, community, religion, and populism. They also demonstrate how sound is essential to the formation of citizenship and nationalism. Sonic media and radio, in particular, have become primary tools for contesting political issues. In that vein, the contributors view the control of radio transmission and those who manipulate its content for political gain. Conversely, they show how, in neoliberal climates, radio programs have exposed corruption and provided a voice for activism. The chapters address sonic production in a variety of media: radio, Internet, digital recordings, phonographs, speeches, carnival performances, fireworks, festivals, and the reinterpretation of sound in literature. They examine the embodied experience of listening and its importance to memory, coding, and identity formation. This collection looks to sonic media as an essential vehicle for transmitting ideologies, imagined communities, and culture. As the contributors discern, sound is ubiquitous, and its study is therefore crucial to understanding the flow of information and influence in Latin America and globally.
