Air Power Supremo William Pyke, 2022-04-13 Sir John Slessor was one of the twentieth century's most distinguished wartime commanders and incisive military thinkers and William Pyke's comprehensive new biography reveals how he earned this remarkable reputation. Slessor, a polio victim who always walked with a stick, became a First World War pilot in the Sudan and on the Western Front and a squadron and wing commander in India between the wars. When aerial warfare was still a new concept, he was one of the first to develop practical tactics and strategies in its application. In the Second World War, as the Commander in Chief of Coastal Command during the Battle of the Atlantic and the RAF in the Mediterranean during the Italian and Balkan campaigns, he made a remarkable contribution to the success of Allied air power. Then, after the war, as a senior commander, he established himself as one of the foremost experts on strategic bombing and nuclear deterrence. That is why this insightful biography of a great British airman and his achievements is so timely and important as we enter a new era of strategic doubts and deterrence at the beginning of the twenty-first century. William Pyke follows each stage of Slessor's brilliant career as a pilot and commander in vivid detail. In particular, he concentrates on Slessor's writings from his treatise on the application of air power in support of land armies to his thinking on nuclear deterrence and Western strategy.

A fascinating potpourri embracing the whole story of aviation from those first faltering flights through the conquest of the world by flight, the drama of war in the air right up to the present day and the four ill-fated flights of September 11th 2001. Each story is a superb description of the great moments in the history of aviation. A superb read for both the layman and aviation specialist alike.

Fall of the Red Baron Leon Bennett, 2012-02-19

Fighter pilot Manfred von Richthofen, the Red Baron, lacked innate aerobatic ability. As a tyro, he attempted to solve this problem through denial, going so far as to sneer at stunting as pointless. Great War air combat experience proved quite the reverse, and so we would anticipate a short and sad fighting life for the fellow. Yet the Red Baron became the Great War's single greatest scorer, as measured by total victories. How did he do it? This book is concerned with tactics, especially those tactics used by the Red Baron and his opponents. It offers the how and why of Great War aerial combat. The author leans heavily on his expertise in engineering and aerodynamic techniques to explain this with his reasoning presented in a readable, non-mathematical style. Absent are both the usual propaganda-laced Air Service reports and psychobabble. Offered instead is the logic behind Great War aerial combat, i.e. those elements determining success or failure. In the Red Baron's air war, Gunnery experience led to the machine gun as the weapon best suited for aerial combat. Joined with a suitable aircraft, the extremely successful Fokker diving attack resulted. In reaction, effective defensive techniques arose, using forms of shrewd tactical cooperation by two-seater crews: pilot and gunner. These are detailed. Numbers mattered, establishing the level of assault firepower. Tactics of machines flying together in formation are given, as well as those of formation busters intent upon reversing the odds and turning large numbers into a disadvantage. A pilot's nature and emotions had much to do with choosing between the options defining tactics. What were the aces like? How were tactics tailored to suit personality? What traits made for the ability to grapple with a jammed machine gun? A dozen high achievers are examined in terms of tactics and background. In a fascinating study, Leon Bennett covers all of these aspects of WWI aerial combat and more. Similarly, the author turns his attention to examining the cause of von Richthofen's death, employing the tools of logic rather than merely accepting one of the many conflicting eyewitness reports as truth. In doing so, much testimony is exposed as unlikely. The bullet scatter to be expected from ground anti-aircraft fire matters greatly and is developed along with the odds against lone riflemen hoping to hit a fast-moving, low-altitude target. The most dangerous altitude for front-line crossing is established. The author concludes by rating the possibility of a rifleman downing the Red Baron as quite realistic, certainly as likely as any of the more celebrated possibilities. This is an important book offering a groundbreaking account of WWI aerial tactics and a thorough examination of the final combat and death of the Red Baron.

Aviation and Aeronautical Engineering, 1919 **The Sky With Diamonds** Malcolm Macdonald, 2013-10-10

It is the 1920s, an age of innovation and daring in transportation, both on the road and in the air. At the forefront of motor car development is Somerville's. To own a Somerville-bodied Rolls-Royce is every man's dream. But when George Somerville has an accident that leaves him paralysed, the future of the firm looks uncertain. George has no sons old enough to manage the firm. He does, however, have a wife. Defying general skepticism and her own doubts,

Julia gradually takes control warding off takeover attempts with breathtaking skill and cunning In Eliot Baring an American employee and a brilliant airplane engineer she sees a new future for Somerville s and perhaps for herself Together they take Somerville s into the skies where competition is fierce and enemies common But the skies darken as fascism spreads across Europe and Julia s conscience becomes ever more important in Somerville s future Beset on all sides deserted by her colleagues and lovers her future looks bleak until help comes from the most unexpected quarter **Aeronautics** ,1949

The Royal Flying Corps later the Royal Air Force was formed in 1912 and went to war in 1914 where it played a vital role in reconnaissance supporting the British Expeditionary Force as air cavalry and also in combat establishing air superiority over the Imperial German Air Force Edward Bujak here combines the history of the air war including details of strategy tactics technical issues and combat with a social and cultural history The RFC was originally dominated by the landed elite in Lloyd George s phrase from the stateliest houses in England and its pilots were regarded as knights of the air Harlaxton Manor in Lincolnshire seat of landed gentry became their major training base Bujak shows how within the circle of the RFC the class divide and unconscious superiority of Edwardian Britain disappeared absorbed by common purpose technical expertise and by an influx of pilots from Canada Australia New Zealand and South Africa He thus provides an original and unusual take on the air war in World War I combining military social and cultural history
