Raines, 1994 Activities to expand children's favorite books Primary grades *High-Interest Mini Mysteries (RL 2-3)*, Human Activities and the Tropical Rainforest Bernard K. Maloney, 1998 Arising initially from a conference, the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way. Other books have considered some but not all of these themes; however, none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself. Because of the approach taken, this book should appeal across traditional disciplinary boundaries. Indeed, a prime aim has been to suggest that rainforest, because of its complexity and the complexity of people-rainforest relationships throughout time, deserves study from a broad perspective. This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto. This book is aimed at geographers, physical and human social anthropologists, archaeologists, pedologists, foresters, and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest. **Proceedings of the National Association for Multicultural Education** Carl A. Grant, 2012-12-06 The National Association for Multicultural Education (NAME) held its 7th Annual Conference in 1997 with a theme of Daring to Educate for Equity and Excellence: A Multicultural and Bilingual Mandate for the 21st Century. The conference generated scholarship in the form of keynote speeches and conference papers and stimulating discussions among the membership. The conference's southwest location of Albuquerque, New Mexico, provided an excellent backdrop to discuss the interconnections between multicultural education and bilingual education as well as provide an opportunity for proponents of both of these important ideas to engage in useful and important discussions. The essays comprised in this book capture much of the written record of the conference. They convey ideas, beliefs, and research findings that were presented at the formal sessions at the conference. Just as with NAME's previous proceedings, it is expected that these proceedings will become not only a written record of the conference but a live curriculum to help pre-K through college educators to prepare

themselves and those they teach for the 21st century
