## Rainbow Mars:

**Rainbow Mars** Larry Niven, 2000-05-15 A brilliantly conceived funny story cycle by the New York Times bestselling author about a time traveler's quest to repopulate a far future Earth Kirkus Reviews Hanville Svetz was born into a future earth that matches the sorriest predictions of Greenpeace With most of Earth's original species extinct Svetz travels back and forth in time retrieving them And when he learns that Mars was inhabited and how the sapient Martian species were wiped out he foresees that Earth could soon fall victim to the same fate In *Rainbow Mars* multiple Hugo Award winner Larry Niven combines an original novella and five related short stories revolving around the concept of time travel with a fantastic twist Known for his hard science and imaginative storytelling Niven now illustrates his skill at offbeat seriocomic sf Library Journal Niven's masterly use of SF strategy hits every note springing surprises and plot turns with dizzying pace Los Angeles Times *Rainbow Mars* Hb Book Club Larry Niven, 1999-01-04 [Rainbow Mars](#) Larry Niven, 2000-01 Future environmentalist Hanville Svetz travels back in time to retrieve extinct life forms and investigate the mystery of the past inhabitants of the Red Planet **Redsine Eight** Trent Jamieson, Garry Nurrish, 2002-05-01 Redsine is a quarterly publication of dark fantasy and horror short stories Issue 8 includes fiction by Rhys Hughes Gene O'Neill Mark McLaughlin and many others Also includes an interview with Tim Powers *The Chautauquan*, 1891 [Electrical World](#), 1898 **The Year's Best Science Fiction: Seventeenth Annual Collection** Gardner R. Dozois, 2000 More than 250 000 words of fantastic fiction **The American Federationist**, 1903 Includes separately paged Junior union section **Astrofuturism** De Witt Douglas Kilgore, 2010-08-03 Astrofuturism Science Race and Visions of Utopia in Space is the first full scale analysis of an aesthetic scientific and political movement that sought the amelioration of racial difference and social antagonisms through the conquest of space Drawing on the popular science writing and science fiction of an eclectic group of scientists engineers and popular writers De Witt Douglas Kilgore investigates how the American tradition of technological utopianism responded to the political upheavals of the twentieth century Founded in the imperial politics and utopian schemes of the nineteenth century astrofuturism envisions outer space as an endless frontier that offers solutions to the economic and political problems that dominate the modern world Its advocates use the conventions of technological and scientific conquest to consolidate or challenge the racial and gender hierarchies codified in narratives of exploration Because the icon of space carries both the imperatives of an imperial past and the democratic hopes of its erstwhile subjects its study exposes the ideals and contradictions endemic to American culture Kilgore argues that in the decades following the Second World War the subject of race became the most potent signifier of political crisis for the predominantly white and male ranks of astrofuturism In response to criticism inspired by the civil rights movement and the new left astrofuturists imagined space frontiers that could extend the reach of the human species and heal its historical wounds Their work both replicated dominant social presuppositions and supplied the resources necessary for the critical utopian projects that emerged from the

antiracist socialist and feminist movements of the twentieth century This survey of diverse bodies of literature conveys the dramatic and creative syntheses that astrofuturism envisions between people and machines social imperatives and political hope physical knowledge and technological power Bringing American studies utopian literature popular conceptions of race and gender and the cultural study of science and technology into dialogue Astrofuturism will provide scholars of American culture fans of science fiction and readers of science writing with fresh perspectives on both canonical and cutting edge astrofuturist visions
