in production settings From the Foreword by Paul Dix series editor Machine Learning in Production is a crash course in data science and machine learning for people who need to solve real world problems in production environments Written for technically competent accidental data scientists with more curiosity and ambition than formal training this complete and rigorous introduction stresses practice not theory Building on agile principles Andrew and Adam Kelleher show how to quickly deliver significant value in production resisting overhyped tools and unnecessary complexity Drawing on their extensive experience they help you ask useful questions and then execute production projects from start to finish The authors show just how much information you can glean with straightforward queries aggregations and visualizations and they teach indispensable error analysis methods to avoid costly mistakes They turn to workhorse machine learning techniques such as linear regression classification clustering and Bayesian inference helping you choose the right algorithm for each production problem Their concluding section on hardware infrastructure and distributed systems offers unique and invaluable guidance on optimization in production environments Andrew and Adam always focus on what matters in production solving the problems that offer the highest return on investment using the simplest lowest risk approaches that work Leverage agile principles to maximize development efficiency in production projects Learn from practical Python code examples and visualizations that bring essential algorithmic concepts to life Start with simple heuristics and improve them as your data pipeline matures Avoid bad conclusions by implementing foundational error analysis techniques Communicate your results with basic data visualization techniques Master basic machine learning techniques starting with linear regression and random forests Perform classification and clustering on both vector and graph data Learn the basics of graphical models and Bayesian inference Understand correlation and causation in machine learning models Explore overfitting model capacity and other advanced machine learning techniques Make informed architectural decisions about storage data transfer computation and communication Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details      **The Morning Star and Free Baptist** ,1908      *The Bengal Diaspora* Claire

Alexander,Joya Chatterji,Annu Jalais,2015-11-06 India's partition in 1947 and the creation of Bangladesh in 1971 saw the displacement and resettling of millions of Muslims and Hindus resulting in profound transformations across the region A third of the region's population sought shelter across new borders almost all of them resettling in the Bengal delta itself A similar number were internally displaced while others moved to the Middle East North America and Europe Using a creative interdisciplinary approach combining historical sociological and anthropological approaches to migration and diaspora this book explores the experiences of Bengali Muslim migrants through this period of upheaval and transformation It draws on over 200 interviews conducted in Britain India and Bangladesh tracing migration and settlement within and from the Bengal delta region in the period after 1947 Focussing on migration and diaspora from below it teases out fascinating hidden migrant stories including those of women refugees and displaced people It reveals surprising similarities and important

differences in the experience of Muslim migrants in widely different contexts and places whether in the towns and hamlets of Bengal delta or in the cities of Britain Counter posing accounts of the structures that frame migration with the textures of how migrants shape their own movement it examines what it means to make new homes in a context of diaspora The book is also unique in its focus on the experiences of those who stayed behind and in its analysis of ruptures in the migration process Importantly the book seeks to challenge crude attitudes to Muslim migrants which assume their cultural and religious homogeneity and to humanize contemporary discourses around global migration This ground breaking new research offers an essential contribution to the field of South Asian Studies Diaspora Studies and Society and Culture Studies *The Contributor* ,1884 *Medical News* ,1905
