Raise Race Rays Raze 1st Edition:

Jazz Griots Jean-Philippe Marcoux, 2012-06-27 This book studies how four representative African American poets of the 1960s Langston Hughes Umbra s David Henderson and the Black Arts Movement s Sonia Sanchez and Amiri Baraka engage in the tradition of griots in poetic dialogues with aesthetics music politics and Black History In so doing they narrate using jazz as meta language genealogies etymologies cultural legacies and Black hi stories In intersecting and complementary ways Hughes Henderson Sanchez and Baraka fashioned their griotism from theorizations of artistry as political engagement and in turn formulated a Black aesthetic based on jazz performativity on a series of jazz infused iterations that form a complex pattern of literary musical historical and political moments in constant cross fertilizing dialogues with one another This form of poetic call and response becomes a definitional literary template for these poets as it allows both the possibility of intergenerational dialogues between poets and musicians and dialogic potential between song and politics between Africa and Black America between vernacular continuums in their poems

Digital Black Feminism Catherine Knight Steele, 2021-10-26 Winner Diamond Anniversary Book Award awarded by the National Communication Association Winner 2022 Nancy Baym Book Award given by the Association of Internet Researchers Traces the longstanding relationship between technology and Black feminist thought Black women are at the forefront of some of this century s most important discussions about technology trolling online harassment algorithmic bias and influencer culture But Catherine Knight Steele argues that Black women s relationship to technology began long before the advent of Twitter or Instagram To truly listen to Black women Steele points to the history of Black feminist technoculture in the United States and its ability to decenter white supremacy and patriarchy in a conversation about the future of technology Using the virtual beauty shop as a metaphor Digital Black Feminism walks readers through the technical skill communicative expertise and entrepreneurial acumen of Black women s labor born of survival strategies and economic necessity both on and offline Positioning Black women at the center of our discourse about the past present and future of technology Steele offers a through line from the writing of early twentieth century Black women to the bloggers and social media mavens of the twenty first century She makes connections among the letters news articles and essays of Black feminist writers of the past and a digital archive of blog posts tweets and Instagram stories of some of the most well known Black feminist writers of our time Linking narratives and existing literature about Black women s technology use in the nineteenth twentieth and twenty first century Digital Black Feminism traverses the bounds between historical and archival analysis and empirical internet studies forcing a reconciliation between fields and methods that are not always in conversation As the work of Black feminist writers now reaches its widest audience online Steele offers both hopefulness and caution on the implications of Black feminism becoming a digital product

the civil rights movement the schools strove not simply to bolster the academic skills and self esteem of inner city African American youth but also to decolonize minds and foster a vigorous and regenerative sense of African identity In *We Are An African People* historian Russell Rickford traces the intellectual lives of these autonomous black institutions established dedicated to pursuing the self determination that the integrationist civil rights movement had failed to provide Influenced by Third World theorists and anticolonial campaigns organizers of the schools saw formal education as a means of creating a vanguard of young activists devoted to the struggle for black political sovereignty throughout the world Most of the institutions were short lived and they offered only modest numbers of children a genuine alternative to substandard inner city public schools Yet their stories reveal much about Pan Africanism as a social and intellectual movement and as a key part of an indigenous black nationalism Rickford uses this largely forgotten movement to explore a particularly fertile period of political cultural and social revitalization that strove to revolutionize African American life and envision an alternate society Reframing the post civil rights era as a period of innovative organizing he depicts the prelude to the modern Afrocentric movement and contributes to the ongoing conversation about urban educational reform race and identity
