the Quality of Jobs Raymond Robertson, Drusilla Brown, Ga lle Le Borgne Pierre, Maria Laura Sanchez-Puerta, 2009-07-17

Since the early 1990s most developing economies have become more integrated with the world s economy Trade and foreign investment barriers have been progressively lifted and international trade agreements signed These reforms have led to important changes in the structures of these economies The labor markets have adjusted to these major changes and workers were required to adapt to them in one way or another In 2006 the Social Protection Unit of the World Bank launched an important research program to understand the impact that these profound structural changes have had on workers in developing countries Globalization Wages and the Quality of Jobs Five Country Studies presents the findings and insights of this important research program In particular the authors present the similar experiences of low income countries with globalization and suggest that low income countries working conditions have improved in the sectors exposed to globalization However Globalization Wages and the Quality of Jobs also highlights concerns about the sustainability of these improvements and that the positive demonstration effects on the rest of the economy are unclear The empirical literature that exists although vast does not lead to a consensus view on globalization s eventual impact on labor markets Understanding the effects of globalization is crucial for governments concerned about employment working conditions and ultimately poverty reduction Beyond job creation improving the quality of those jobs is an essential condition for achieving poverty reduction Globalization Wages and the Quality of Jobs adds to the existing literature in two ways First the authors provide a comprehensive literature review on the current wisdom on globalization and present a micro based framework for analyzing globalization and working conditions in developing countries Second the authors apply this framework to five developing countries Cambodia El Salvador Honduras Indonesia and Madagascar This volume will be of interest to government policy makers trade officials and others working to expand the benefits of globalization to developing countries

Development and Globalization David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory chapter situating the author s work in a larger intellectual and political context The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism

Transnational Conflicts William I. Robinson, 2020-05-05 In this timely and provocative study William I Robinson challenges received wisdom on Central America He starts with an exposition on the new global capitalism Then drawing on a wide range of historical documentation interviews and social science research he proceeds to show how

capitalist globalization has thoroughly transformed the region disrupting the conventional pattern of revolutionary upheaval civil wars and pacification and ushering in instead a new transnational model of economy and society Beyond his focus on Central America Robinson provides a critical framework for understanding development and social change in other regions of the world in the age of globalization Demonstrating how the very forces of capitalism have brought into being new social agents and political actors unlikely to acquiesce in the face of the emerging order Transnational Conflicts shows why the Isthmus along with other regions is likely to return to the headlines in the near future

The UN's Role in Nation-Building: From the Congo to Iraq James Dobbins, Seth G. Jones, Keith Crane, Andrew Rathmell, Brett Steele, 2001-03-29

Reviews UN efforts to transform eight unstable countries into democratic peaceful and prosperous partners and compares those missions with U S nation building operations The UN provides the most suitable institutional framework for nation building missions that require fewer than 20 000 men one with a comparatively low cost structure a comparatively high success rate and the greatest degree of international legitimacy

The DAC Guidelines Strengthening Trade Capacity for Development OECD, 2001-10-29 These Guidelines help developing countries enhance their capacity to trade and participate more effectively in the international rule making and institutional mechanisms that shape the global trading system They also provide a common reference point for the trade aid and finance communities

At War's End Roland Paris, 2004-05-24 All fourteen major peacebuilding missions launched between 1989 and 1999 shared a common strategy for consolidating peace after internal conflicts immediate democratization and marketization Transforming war shattered states into market democracies is basically sound but pushing this process too quickly can have damaging and destabilizing effects The process of liberalization is inherently tumultuous and can undermine the prospects for stable peace A more sensible approach to post conflict peacebuilding would seek first to establish a system of domestic institutions that are capable of managing the destabilizing effects of democratization and marketization within peaceful bounds and only then phase in political and economic reforms slowly as conditions warrant Peacebuilders should establish the foundations of effective governmental institutions prior to launching wholesale liberalization programs Avoiding the problems that marred many peacebuilding operations in the 1990s will require longer lasting and ultimately more intrusive forms of intervention in the domestic affairs of these states This book was first published in 2004

Governments, Globalization, and International Business John H. Dunning, 1997-07-24 It is a cliché to say that we live in a globalized world in which investment flows communications and the operations of multinationals from all parts of the world have changed the character of the international business environment But the easy concept of globalization poses as many questions as it answers and it is the purpose of this book to address these challenges In *Governments Globalization and International Business* a prestigious group of international scholars

explore in detail the consequences of globalization defined as the deepening structural interdependence of the world economy In Part 1 John Dunning Richard Lipsey Susan Strange and Stephen Kobrin analyse these changes from different disciplinary perspectives and intellectual backgrounds The basic question they address is what are the consequences of globalization on the nature form and level of domestic economic activity In doing so they also consider the increasing mobility of knowledge and information the role of international corporations and the sovereignty of the nation state in the modern borderless world In Part 2 the different experiences and policies of a number of economies are assessed in a series of country studies These include the G7 countries as well as the developing East Asian economies Latin America and smaller developed countries In the final part John Stopford and Edward Graham stand back and look at the changing role of National and Supranational governance In doing so they underscore a fundamental tenet of the volume that globalization requires national governments to re evaluate various factors of their systemic governance Yet despite apparently convergent trends they argue there are no universal prescriptions for the way governments should respond to globalization and the policy challenge is a more complex one than merely more or less government The Leadership Moment Michael
