Who Really Rules? G. William Domhoff, 1978 Robert A Dahl's Who Governs is a classic pluralist study which has had an important influence on American social science since the early sixties Who Really Rules provides a categorical challenge empirical methodological and theoretical to Dahl's work Empirically Domhoff's restudy of New Haven shows through newly discovered documents that Dahl was wrong about the pluralism of New Haven's power structure He also presents the most systematic statement of power structure methodology yet made a statement that contradicts Dahl's methodological claims which have been the prevailing wisdom in American social science for over fifteen years Finally Domhoff outlines the national policy planning network through which the big business ruling class dominates urban government Who Really Rules is unique in that it makes possible for the first time a dialogue between pluralist and ruling class views on the basis of studies of the same city by leading exponents of the rival theoretical positions It is original in that it includes much data not revealed by Dahl It presents the methodology of power structure research in the most comprehensive fashion yet attempted and reveals a ruling class network for urban policy planning that has never before been fully articulated

The Meaning Of Social Policy Bernice Q. Gusfield, 2015-03-31 In recent years the social sciences and the humanities have drawn closer to each other in thought and method This rapprochement has led to new perceptions of human behavior by sociologists as well as new methodological orientations Sociologist Joseph R Gusfield draws upon drama and fiction to show how human action is shaped by the formal dimensions of performance Gusfield first defines the concept of behavior as artistic performance He then analyzes routine and classic social research reports as literary performances in qualitative and quantitative terms Next he moves to social movements and public actions demonstrating how objects and events are products of the interpretation and reflection of individuals He draws upon literary and artistic conventions to deal with issues of representation and meaning In the first and last chapters Gusfield provides a conceptual summary examining the relation between sociology as science and art arguing that sociological methods are neither science nor art but partake of both Following the philosopher Paul Ricoeur Gusfield shows how human behavior can be read as a text always telling the participant or observer something about something *Performing Action* will be of interest to sociologists psychologists and students of aesthetics and critical theory      **Meeting Public Demands**, 1988      **Public Service Employment Legislation, 1974, Hearings Before the Subcommittee on Employment, Poverty, and Migratory Labor Of...**, 93-2, Sept. 16; Oct. 16 and 17, 1974 United States.
