Occhipinti,Tara Hefferan,2010-07-02 This edited collection provides an in depth ethnographic study of faith based development organizations in the United States shining a much needed critical light onto these organizations and their role in the United States by exploring the varied ways that faith based organizations attempt to mend the fissures and mitigate the effects of neoliberal capitalism poverty and the social service sector on the poor and powerless In doing so Not by Faith Alone generates provocative and sophisticated analyses grounded in empirical case studies of such topics as the meaning of faith based development evaluations of faith based versus secular approaches the influence of faith orientation on program formulation and delivery and examinations of faith based organizations impacts on structural inequality and poverty alleviation Taken together the chapters in this volume demonstrate the vital importance of ethnography for understanding the particular role of faith based agencies in development The contributors argue for an understanding of faith based development that moves beyond either dismissing or uncritically supporting faith based initiatives Instead contributors demonstrate the importance of grounded analysis of the specific discourses practices and beliefs that imbue faith based development with such power and reveal both the promise and the limitations of this particular vehicle of service delivery *The Sociology of Community Connections* John G. Bruhn,2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a

place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decade of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future

Charitable Choice at Work Sheila Suess Kennedy, 2006-11-17 Too often say its critics U S domestic policy is founded on ideology rather than evidence Take Charitable Choice legislation enacted with the assumption that faith based organizations can offer the best assistance to the needy at the lowest cost The Charitable Choice provision of the 1996 Welfare Reform Act buttressed by President Bush s Faith Based Initiative of 2000 encouraged religious organizations including congregations to bid on government contracts to provide social services But in neither year was data available to prove or disprove the effectiveness of such an approach Charitable Choice at Work fills this gap with a comprehensive look at the evidence for and against faith based initiatives Sheila Suess Kennedy and Wolfgang Bielefeld review the movement s historical context along with legal analysis of constitutional concerns including privatization federalism and separation of church and state Using both qualitative and where possible statistical data the authors analyze the performance of job placement programs in three states with a representative range of religious political and demographic traits Massachusetts Indiana and North Carolina Throughout they focus on measurable outcomes as they compare non faith based with faith based organizations nonprofits with for profits and the logistics of contracting before and after Charitable Choice Among their findings in states where such information is available the composition of social service contractor pools has changed very little Reflecting their varied political cultures states have funded programs differently Faith based organizations have not been eager to seek government contracts perhaps wary of additional legal restraints and reporting burdens The authors conclude that faith based organizations appear no more effective than secular organizations at government funded social service provision that there has been no dramatic change in the social welfare landscape since Charitable Choice and that the constitutional concerns of its detractors may be valid This empirical study penetrates the fog of the culture wars moving past controversy over the role of religion in public life to offer pragmatic suggestions for policymakers and organizations who must decide how best to assist the needy
