Setting Priorities For Land Conservation:

Setting Priorities for Land Conservation National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Scientific and Technical Criteria for Federal Acquisition of Lands for Conservation, 1993-02-01 This book responds to a congressional request to evaluate criteria by which land is acquired under the Land and Water Conservation Fund. The committee reviews criteria and procedures by which four agencies acquire lands for conservation, examines the historic public policy and scientific bases of criteria, and compares them with nongovernmental organizations and assesses the effectiveness of the agencies in preserving natural resources while achieving agency objectives. *Setting Priorities for Land Conservation* National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Scientific and Technical Criteria for Federal Acquisition of Lands for Conservation, 1993-02-01 This book responds to a congressional request to evaluate criteria by which land is acquired under the Land and Water Conservation Fund. The committee reviews criteria and procedures by which four agencies acquire lands for conservation, examines the historic public policy and scientific bases of criteria, and compares them with nongovernmental organizations and assesses the effectiveness of the agencies in preserving natural resources while achieving agency objectives.

Nature-friendly Land Use Practices at Multiple Scales Rebecca Lynn Kihlslinger, James M. McElfish, 2009 This unique book is organized around eight detailed case studies of private land developers, local governments, and public agencies that have worked across jurisdictional and ecological boundaries to effectively address habitat conservation. The book includes two essays by leading conservation biologists who link planning at scale with sound land use decisions. Book Jacket

Conservation Trusts Sally K. Fairfax, Darla Guenzler, 2001 In the wake of the Exxon Valdez oil spill, a conservation trust helped stabilize and regenerate the damaged area. When bird habitats along the Platte River were threatened by Grayrocks Dam, a similar trust came to their rescue. And if a family wants to protect its land for future generations, establishing a trust may be the best solution. For more than a century, bequests of land and funds for environmental protection have been common, but in recent decades, the trusts used to address conservation issues and resolve environmental disputes have diversified and grown significantly. This book examines a variety of conservation organizations built on or close to trust principles: some government creations, some private, some combinations of the two, to explain how conservation trusts are created and how they work. It explores strengths and weaknesses of the trust concept, considers the widespread use of land trusts, and presents case studies that both illustrate successes and give instructive examples of potential pitfalls. Drawing on cases from Maine to Hawaii, the authors examine the different kinds and configurations of trusts. They consider government trusts that blend federal, state, and local agencies into a single entity or that derive funding from outside legislative and executive channels; trusts established by government and private cooperation to share responsibility for jointly held and managed resources; and trusts established by private organizations and families. For each type, they explain why each is

created how it operates and whether it has been proven effective They also address the important issue of accountability and consider when a trust is not the answer to a problem As more Americans reject federal control of land in favor of local determination land trusts have become the most popular tool for the preservation of land habitats and species And as the sharing of authority among public private and diverse government partners becomes more prevalent sound guidelines for establishing effective trusts are critical This book shows how the trust template provides an invaluable approach for future conservation efforts and is a primer for anyone involved in environmental management *Restoring Diversity* , In April 1993 a conference of academic biologists agency staff members activists and other experts critically explored the value of ecological restoration as a conservation strategy *Restoring Diversity* examines and expands on the issues set forth at that gathering including strategy case studies the biology of restoration and the use of mitigation in rare plant conservation

Conservancy Richard Brewer, 2013-06-03 Land trusts or conservancies protect land by owning it Although many people are aware of a few large land trusts The Nature Conservancy and the Trust for Public Land for instance there are now close to 1 300 local trusts with more coming into being each month American land trusts are diverse shaped by their missions and adapted to their local environments Nonetheless all land trusts are private non profit organizations for which the acquisition and protection of land by direct action is the primary or sole mission Nonconfrontational and apolitical land trusts work with willing land owners in voluntary transactions Although land trusts are the fastest growing and most vital part of the land conservation movement today this model of saving land by private action has become dominant only in the past two decades Brewer tells why the advocacy model in which private groups try to protect land by promoting government purchase or regulation in the 1980s was eclipsed by the burgeoning land trust movement He gives the public a much needed primer on what land trusts are what they do how they are related to one another and to other elements of the conservation and environmental movements and their importance to conservation in the coming decades As Brewer points out unlike other land saving measures land trust accomplishments are permanent At the end of a cooperative process between a landowner and the local land trust the land is saved in perpetuity Brewer s book the first comprehensive treatment of land trusts combines a historical overview of the movement with more specific information on the different kinds of land trusts that exist and the problems they face The volume also offers a how to approach for persons and institutions interested in donating selling or buying land discusses four major national land trusts The Nature Conservancy Trust for Public Land American Farmland Trust and Rails to Trails Conservancy and gives a generous sampling of information about the activities and accomplishments of smaller local trusts nationwide Throughout the book is enriched by historical narrative analysis of successful land trusts and information on the how and why of protecting land as well as Brewer s intimate knowledge of ecological systems biodiversity and the interconnectedness of human and non human life forms *Conservancy* is a must read volume for people interested in land conservation including land trust members volunteers and supporters as well as anyone

Our whole nation benefits from the preservation of natural habitats and their diversity of animal and plant species yet small groups of private landowners often bear most of the costs of setting land aside for conservation purposes This imbalance has generated many conflicts since the passage of the Endangered Species Act in 1973 and remains one of the most controversial issues to be resolved as the ESA makes its way through Congress for reauthorization To provide policy makers landowners and other stakeholders in the ESA debates with impartial baseline information this book offers multidisciplinary perspectives on the role that private property plays in protecting endangered species in the United States The opening chapter traces the evolution of the ESA and set forth the parameters of the debate over regulation of private property Four subsequent chapters explore the judicial and economic implications of ESA and suggest how issues of scale and diversity affect the implementation of the ESA on private property The volume concludes with eight principles to help frame the ongoing ESA reauthorization debate developed by the University of Wyoming s Institute for Environment and Natural Resources Policy Board the sponsor of the research presented in this book **Status and Management of Neotropical Migratory Birds** Deborah M.
