Social Science Concepts and Measurement Gary Goertz,2020-09-29 A fully revised edition of the classic reference on concepts and their role in social science research *Social Science Concepts and Measurement* offers an updated look at the theory and methodology of concepts for the social sciences Emphasizing that most concepts are multilevel and multidimensional this revised edition continues to bring the qualitative and quantitative closer together with new chapters devoted to scaling aggregation and the methodological links between the semantics of concepts and numeric measures In addition it stresses that concepts are used for description and causal inference and contain normative judgments Initial chapters focus on conceptualization followed by chapters on issues of measurement The textbook examines concepts in the international arena such as the global performance indicators used by international organizations like the UN and the World Bank as well as classic paired concepts such as poverty and wealth democracy and authoritarianism and war and peace

Additionally it explores such topics as typologies hybrid concepts and how complex concepts constitute complex theories The volume serves as a guide to the methodology of concepts in the classroom and is accompanied by more than two hundred exercises Social Science Concepts and Measurement is an indispensable resource for graduate students and scholars

A Framework for Ecosystem Management in the Interior Columbia Basin and Portions of the Klamath and Great Basins, 1996 **General Technical Report PNW-GTR**, 1995 A Framework for Ecosystem Management in the Interior Columbia Basin and Portions of the Klamath and Great Basins Richard W. Haynes, Russell T. Graham, Thomas Milton Quigley, 1996 A framework for ecosystem management is proposed This framework assumes the purpose of ecosystem management is to maintain the integrity of ecosystems over time and space It is based on four ecosystem principles ecosystems are dynamic can be viewed as hierarchies with temporal and spatial dimensions have limits and are relatively unpredictable This approach recognizes that people are part of ecosystems and that stewardship must be able to resolve tough challenges including how to meet multiple demands with finite resources The framework describes a general planning model for ecosystem management that has four iterative steps monitoring assessment decision making and implementation Since ecosystems cross jurisdictional lines the implementation of the framework depends on partnerships among land managers the scientific community and stakeholders It proposes that decision making be based on information provided by the best available science and the most appropriate technologies for land management Page ii
