Koko, 2008-03-30 Events in the post Cold War era have challenged the notions of realism and realpolitik with an upsurge in intrastate conflicts involving other actors than just the state During this period the international community has witnessed the limitations of the tenets of realism for addressing disastrous civil wars or ethno political conflicts internal to the states Largely because of this and alongside the emerging field of conflict resolution in western countries transitional conflict resolution mechanisms emerged with characteristic multi track diplomacy orientations for solving national problems within African countries By the end of the 1980s and early 1990s several African countries including South Africa Burundi and Sierra Leone resorted to either a Truth and Reconciliation Commission or an international tribunal to handle violence and restore peace and justice In the same period other African countries opted for what was called national conference to solve their national problems and transform conflict into an opportunity for structural change In February 1990 the Republic of Benin a small nation state in West Africa achieved peace through a national conference The national conference in Benin was a national gathering for crisis resolution through social debates on critical issues facing the nation and political decision making for constructive changes As a pioneer Benin led the political change movement of the national conference and was later followed by eight other African countries namely Chad Congo Brazzaville Gabon Mali Niger Togo the Central African Republic and the former Zaire now known as the Democratic Republic of Congo

To date most of the existing literature on the subject explores the phenomenon of national conference as something of a prelude to political transition to multipartyism and democracy Part of the literature depicts the national conference as a civil coup d'etat and recommends its institutionalization as a system for democratic transitions This book takes a different approach by conceptualizing the national conference phenomenon as a multi track diplomacy tool or as a process for conflict transformation and peacemaking Building upon theories of conflict and conflict resolution the author analyzes the national conference as a unique diplomatic approach to transforming national crisis which expands the scope of strategies for peacemaking

**Peoples, Beliefs, Cultures, and Justice in Afro-Catholicism: Ikpu-Ala and Igbo Church** Okey Jude Uche, 2017-11-10 This book explores in depth Ikpu ala as a social justice value in the Igbo social justice system The traditional social justice concept of ikpu ala provides an important conceptual framework through which adult Igbo Christians can engage in a critical and conscious theological reflections upon how they can make the Igbo Christian community fully authentic and faithful to the Gospel of Jesus Christ This is a process that will highlight the total transformation of the Igbo society which began with the arrival of the missionaries in 1885 This reflection is based on the Igbo experience and understanding of Omenala the Igbo moral code in which the world of the material and the spiritual while occupying distinct domains nonetheless remain deeply intertwined In this book the author explores that for the Igbo community the reality of theology has evolved as a distinct from of experience that is deeply connected with tradition for the sake of praxis Don Browning 1995 Consequently the author not only sees Ikpu ala as authentic Igbo social justice value but also considers it as something that can be integrated into the Christian social values without either destroying Igbos longstanding cultures or traditions The author highlights two key lessons from the Igbo integration of ikpu ala into Christian social justice 1 that the Igbo Catholic Church should engage the Igbo culture and traditions in a theological interactive reflections for the incarnation of the Word among the Igbo Catholics and 2 that Ikpu ala with its theological values can assist the Igbo Catholic Church in the sacrament of reconciliation and so transform the twenty first century Igbo Catholic into an integrated and authentic Christian

**Emerging Adulthood in Hong Kong** Chau-kiu Cheung, 2017-09-22 How emerging adults broadly referring to those aged from 18 to 29 years old fare in civic engagement as compared with other adults is the focus of the present work The work takes civic engagement to comprise prosociality in civil society sustaining social institutions and challenging institutions Delineating a theoretical framework based on voluntaristic theory the work expects to find differences in civic engagement due to the voluntaristic mechanisms of power realization utilitarian optimization normative conformity and idealistic consistency maintenance in the emerging adult as compared with the other Using survey data from 25 878 Chinese adults in Hong Kong the work illustrates that the emerging adult is higher than is the other in challenging social institutions notably in terms radicalism and occupying protest Moreover the emerging adult is less prosocial in terms in community participation Meanwhile the emerging adult is not consistently different from the other in

sustaining social institutions The findings are crucial given the control various background characteristics including age education marriage and employment These findings are therefore useful for illustrating social forces postulated in voluntaristic theory for explaining civic engagement Post-Cold War Conflicts in Africa Augustine C Ohanwe,2009-07-31 During the Cold War ideological and politico military rivalries mostly dictated the actions of the competing blocs including their involvement in foreign conflicts In Africa for instance the East West rivalry of the time not only fuelled conflicts but also appeared to undermine the use of diplomacy as a tool for peacemaking and conflict resolution With the fall of the Berlin Wall in 1989 and the demise of the Soviet Union however there was a transformation of the conflict arena in the continent which presented new opportunities and threats This therefore raises a fundamental question of how the end of the Cold War has affected the character of conflicts and their successful management in Africa Using Liberia and Somalia as case studies Post Cold War Conflicts in Africa analyses how the post Cold War conflicts in these two countries and their management differed from what they would have been during the Cold War era It shows for instance that while in Liberia the major powers appeared content to cede the management of the conflict to the sub regional group ECOMOG in Somalia the conflict appeared to be turned into an arena for simple military experiment without any of the old Cold War ideological rivalries playing any role in its trajectory or management The book argues that the end of the Cold War offers an opportunity for the successful use of a new approach to conflict management in the continent which would be anchored on traditional African diplomacy This new approach would involve a triumvirate of eminent men and women from the continent regional peacekeeping forces and the warring factions themselves working in concert to replace the rifle with talking till every one agrees **Police Suicide** John M. Vis,2009 Archaeology as the discipline that searches to explain the development of society by means of material remains has been avoiding the big issues involved with its research agenda The topic of social evolution is concealed by anxiety about previous paradigmatic malpractice and the primary archaeological

division of the world in culture areas still suffers from the archaic methods by which it was established Archaeological inference of developing societies is weighed down by its choice of particularism within agency approaches and overtly reductionist due to the prevalence of statistical classificatory and biological approaches This book addresses these issues through a perspective on the spatial analysis of the built environment As one of the principal properties of our dataset as well as being the first materialisation of sociality such spatialities are suggested to be a fundamental key for enabling an understanding of the developing social identity of places regions and areas In order to arrive at a truly social inference of spatial datasets archaeology's usual analysis working from material remains towards socio cultural interpretations needs to be inverted The vantage point of this study consists of aprioristic social theory It constructs its arguments through an epistemological foundation comprising a selection of essential ideas regarding the three constitutive axes of developing societies time human action and human space As it recognises the inherent position of these axes combined in the discipline of human geography a historical comparison of these two disciplines presents the angle from which plausible theoretical advancements can be made The core of the book explores selected works of human geographers Allan Pred Benno Werlen and Andreas Koch against the backdrop of theories like structuration or systems theory phenomenology action theory and to a lesser extent Actor Network Theory and autopoiesis From this follows its own theoretical proposal called the social positioning of spatialities On this basis hypotheses for methodological opportunities are discussed establishing a research agenda Firmly placing its efforts in current paradigmatic debates in the discipline this study offers archaeological theorists an incentive to leave the safety of materially bound science and adapt an alternative perspective It is an attempt to put archaeology back in the forefront of the social theoretical debates it should contribute to

function within a nation's public life      **Cities Made of Boundaries** Benjamin N. Vis, 2018-09-17 *Cities Made of Boundaries* presents the theoretical foundation and concepts for a new social scientific urban morphological mapping method Boundary Line Type BLT Mapping Its vantage is a plea to establish a frame of reference for radically comparative urban studies positioned between geography and archaeology Based in multidisciplinary social and spatial theory a critical realist understanding of the boundaries that compose built space is operationalised by a mapping practice utilising Geographical Information Systems GIS Benjamin N Vis gives a precise account of how BLT Mapping can be applied to detailed historical reconstructed contemporary and archaeological urban plans exemplified by sixteenth to twenty first century Winchester UK and Classic Maya Chunchucmil Mexico This account demonstrates how the functional and experiential difference between compact western and tropical dispersed cities can be explored The methodological development of *Cities Made of Boundaries* will appeal to readers interested in the comparative social analysis of built environments and those seeking to expand the evidence base of design options to structure urban life and development      *Prescriptive Legal Positivism* Tom Campbell, 2024-11-01 Tom Campbell is well known for his distinctive contributions to legal and political philosophy over three decades In emphasizing the moral and political importance of taking a positivist approach to law and rights he has challenged current academic orthodoxies and made a powerful case for regaining and retaining democratic control over the content and development of human rights This collection of his essays reaches back to his pioneering work on socialist rights in the 1980s and forward from his seminal book *The Legal Theory of Ethical Positivism* 1996 An introductory essay provides an historical overview of Professor Campbell's work and argues for the continuing importance of democratic positivism at a time when it is again becoming clear that courts are ineffective protectors of human rights
