Seven Years Old In The Home Environment:

Seven Years Old in the Home Environment John Newson, Elizabeth Newson, 2017-12-12 John and Elizabeth Newson's long term investigation of child up bringing attracted intense interest from its earliest beginnings pathbreaking and seminal were adjectives that greeted their first report The study is now established as one of the major projects of the seventies This third volume of the series catches some seven hundred Nottingham children at a critical stage of their development in transition from infant to junior school they are moving out of the protective family orbit and into the wider social world of street playground and classroom where cultural pressures make themselves felt in ever more demanding ways Like the Newson's earlier books this study has a strong ecological flavour in the sense that what children do what parents do and how they feel about what they do are all set firmly into the broader context of life as it is lived in contemporary urban society This is no laboratory investigation Yet a sensitive and subtle methodology has allowed the Newsons to present an impressive structure of hard factual data while putting flesh on the statistical bones by constant reference to the mothers own thoughts and reactions faithfully recorded in their own vivid words The result is a rich descriptive picture of seven year olds and their family life their play friendships quarrels their duties and privileges their fears fantasies and jokes Inevitably much of the book explores the dynamics of conflict between mother and child and takes a long hard look at the domestic power game as it is expressed in both words and punishment At the same time the loving and caring side of the relationship is closely and delicately examined with a rare empathy for both parent and child In short this is a study in depth and in breadth of how parents and children bring each other up Teachers doctors nurses and social workers as well as parents welcomed the Newsons earlier reports Once again no professional worker in the field of childhood or parenthood can afford to be without the insights offered by this volume which is also a rich source of enjoyment for any observer professional or amateur of the family in society today Today it can be enjoyed in its historical context

particular attention to the 1970s as a period of transition and one which saw radical visions of child liberation but with anxieties about child protection also escalating in response This is strikingly demonstrated in the story of how the paedophile emerged as a figure of major public concern Thomson argues that this crisis of concern over child freedom is indicative of some of the broader problems of the social settlements that had been forged out of the Second World War

The book describes changes in the U.S. food environment that may explain increases in obesity during recent decades. It explores relationships between parenting practices and the development of eating behaviors in children, highlighting the importance of family mealtimes in healthful eating. The volume provides an overview of efforts to prevent or reduce obesity in children with attention to minority populations and discusses research findings on targets for obesity prevention, including a focus on fathers as change agents who play a crucial yet understudied role in food parenting.
