Mapping an Atlantic World, circa 1500 Alida C. Metcalf, 2020-10-13 How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus's voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus's exploration In Mapping an Atlantic World circa 1500 Alida C Metcalf argues that the earliest surviving maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then

repeated on map after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps **Dictionary Catalog of the Map Division** New York Public Library. the First Falklands Crisis of 1764 71 the Second Falklands Crisis of 1831 3 the Years of Confusion 1811 1850 and the Third Falklands Crisis of 1982 the Falklands War as well as a Falklands perspective on the First and Second World Wars including the Battle of the Falklands 1914 and the Battle of the River Plate 1939 with extensive details and texts from German sources The legal status of the Falklands is analysed by reference to legal works to United Nations resolutions on decolonisation and to rulings by the International Court of Justice which together demonstrate conclusively that the islands are British territory in international law and that the Falkland Islanders who have now 2024 lived in their country for over 180 years and for nine generations are a unique people who are holders of territorial sovereignty with the full right of external self determination
