Sex Drink And Fast Cars:

Sex, Drink and Fast Cars Stephen Bayley, 1986 **Sex and Buildings** Richard J. Williams, 2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue *Sex and Buildings* explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention *Sex and Buildings* will change the way we look at the buildings around us *Motoring* John A. Jakle, Keith A. Sculle, 2008-01-01 *Motoring* unmasks the forces that shape the American driving experience commercial aesthetic cultural mechanical as it takes a timely look back at our historically unconditional love of motor travel Focusing on recreational travel between 1900 and 1960 John A Jakle and Keith A Sculle cover dozens of topics related to drivers cars and highways and explain how they all converge to uphold that illusory notion of release and rejuvenation we call the open road Jakle and Sculle have collaborated on five previous books on the history culture and landscape of the American road Here with an emphasis on the driver s perspective they discuss garages and gas stations roadside tourist attractions freeways and toll roads truck stops bus travel the rise of the convenience store and much more All the while the authors make us think about aspects of driving that are often taken for granted how for instance the many lodging and food options along our highways reinforce the connection between driving and freedom and how by enabling greater speeds highway engineers helped to stoke motorists blessed fantasy of flight Although driving originally celebrated freedom and touted a common experience it has increasingly become a highly regulated isolated activity The motive behind America s first embrace of the automobile individual prerogative still substantially obscures this reality Americans did not have the automobile imposed on them say the authors Jakle and Sculle ask why some of the early prophetic warnings about our car culture went unheeded and why the arguments of its promoters resonated so persuasively Today the automobile is implicated in any number of environmental even social problems As the wisdom of our dependence on automobile travel has come into serious question reassessment of how we first became that way is more important than ever *Motor Vehicles, the Environment, and the Human Condition* Hans A. Baer, 2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate

developed societies in their adoption of the culture of automobility This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor A political ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social structural cultural and environmental contradictions of the capitalist world system In addition to highlighting many of the environmental social and health environmental consequences of humanity's increasing reliance on motor vehicles particularly private automobiles this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible but that such an effort will have to be part and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism

Pacific Automobility Gijs Mom, 2022-09-13 The beginning of the 21st century has seen important shifts in mobility cultures around the world as the West's media driven car culture has contrasted with existing local mobilities from rickshaws in India and minibuses in Africa to cycling in China In this expansive volume historian Gijs Mom explores how contemporary mobility has been impacted by social political and economic forces on a global scale as in light of local mobility cultures the car as an adventure machine seems to lose cultural influence in favor of the car's status character

Cultural Politics in Contemporary America Ian Angus, Sut Jhally, 2022-11-30 First published in 1989 *Cultural Politics in Contemporary America* is a radical attempt to lay out the complex ways in which the American media and American culture is powerfully interlocked At the end of the 20th century the media exerted an overwhelming influence on the formation of social identity through the production and consumption of images The Hollywood Presidency of Ronald Reagan was founded on the skills of the Great Communicator Bruce Springsteen's *Born in the USA* was used by Chrysler Corporation to assure that the pride is back feminists and right wing militants converged to oppose pornography The media American culture and political power were bound together in a gamble the stakes of which increased daily *Cultural Politics* incorporates the struggles of race gender and class the economy of the commercial media system the myths of hegemony and imperialism the crises of privacy and of the intellectual and such diverse issues as postmodernism the American automobile advertising as communication and television While political actors

have changed and media technology has advanced rapidly the outcome of this research still holds true for the 21st century and is of importance to students of media studies cultural studies postmodernism postcolonial studies and political science

Indoor America Andrea Vesentini, 2018-11-27 Cars single family houses fallout shelters air conditioned malls these are only some of the many interiors making up the landscape of American suburbia Indoor America explores the history of suburbanization through the emergence of such spaces in the postwar years examining their design use and representation By drawing on a wealth of examples ranging from the built environment to popular culture and film Andrea Vesentini shows how suburban interiors were devised as a continuous cultural landscape of interconnected and self sufficient escape capsules The relocation of most everyday practices into indoor spaces has often been overlooked by suburban historiography Indoor America uncovers this latent history and contrasts it with the dominant reading of suburbanization as pursuit of open space Americans did not just flee the city by getting out of it they did so also by getting inside Vesentini chronicles this inner directed flight by describing three separate stages The encapsulation of the automobile fostered the nuclear segregation of the family from the social fabric and served as a blueprint for all other interiors Introverted design increasingly turned the focus of the house inward Finally through interiorization the exterior was incorporated into the all encompassing interior landscape of enclosed malls and projects for indoor cities In a journey that features tailfin cars and World s Fair model homes Richard Neutra s glass walls and sitcom picture windows Victor Gruen s Southdale Center and the Minnesota Experimental City Indoor America takes the reader into the heart and viscera of America s urban sprawl *Car Cultures* Daniel Miller, 2020-05-26 Anyone who assumes that a car is simply a means to get from point A to point B or who even thinks that they know what a car is should read this book Profoundly shaped by culture the car gives rise to a wide range of emotions from guilt about the environment in the UK to aboriginal concerns with car corpses to struggles to keep the creatures alive with everything but the proper spare parts in West Africa Cars and their landscapes prove central to human life from its most intimate to the widest sense of global crisis and are capable of inspiring epic passions From road rage in Western Europe to the struggles of cab driving in Africa to the emergence of Black identity in the US this book examines the essential humanity of the car which includes the jealousies gender differences fears and moralities that cars give rise to Firmly grounded in detailed ethnographic and historical scholarship this is the first book to provide an informed sense of cars as one of the most familiar and significant forms of material culture *The Automobile in American History and Culture* Michael L. Living in the Labyrinth of Technology Willem H. Vanderburg, 2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity's first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity's second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg's *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity's third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people's

minds and society's cultures thereby re-creating human life in the image of technology. Living in the Labyrinth of Technology argues that the twenty-first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms.

Gendered Journeys, Mobile Emotions Gillian Reynolds, 2016-04-22 It is increasingly acknowledged that an analysis of emotions is necessary to fully understand the social world and recent research on transport, travel and mobilities has begun to consider the gendered nature of public and personal life in relation to this sphere. The focus of this multidisciplinary and auto-biographical volume is the emotional relationship that individuals and groups have with different means of travel. Attention is given to a variety of travel experiences including travelling in trains, planes, cars, buses and ships as well as biking, cycling, running and walking from the perspective of travellers and those who earn their living in assisting these experiences of others. Imaginary travel and the relationships between art and travel are also considered. Adopting innovative approaches to experiential material ranging from personal memories to empirical research, *Gendered Journeys, Mobile Emotions* opens up and illuminates an interdisciplinary debate about the gendered, emotive and emotional nature of travelling.

Car Troubles Jim Conley, 2016-04-15 *Car Troubles* central premise is that the car as the dominant mode of travel needs to be problematized. It examines a wide range of issues that are central to automobility by situating it within social, economic and political contexts and by combining social theory, specific case studies and policy-oriented analysis. With an international team of contributors, the book provides a coherent and comprehensive analysis of the global phenomenon of automobility from the Anglo world to the cases in China and Chile and all the elements that relate to it.

Our Battle for the Human Spirit Willem H. Vanderburg, 2016-08-04 Western society has become saturated with scientific and technological modes of thinking that impact our lives and our relationships. Expanding social inequality, the use of social media and the rise of mental illnesses such as anxiety and depression are manifestations of this shift in our civilization. *Our Battle for the Human Spirit* is a comprehensive probe into what is happening to human life in the beginning of the 21st century. It explores how culture, experience and symbolization have been replaced by scientific, discipline-based approaches. Willem H. Vanderburg argues that these approaches are inadequate in understanding the complexity of human lives and societies. In order to transcend these limits, Vanderburg calls for the reintegration of culture and symbolization into our daily lives.

Transport Design Gregory Votolato, 2007-08-15 From limousines to canoes to the Apollo spacecraft, Gregory Votolato chronicles the ever-evolving design of vehicles, nautical crafts and other objects of transportation and in particular explores the relationship between mass transportation and the travel experience.

The Automobile and American Life, 2d ed. John Heitmann, 2018-08-03 Now revised and updated, this book tells the story of how the automobile transformed American life and how automotive design and technology have changed over time. It details cars' inception as a mechanical curiosity and later a plaything for the wealthy, racing and the promotion of the industry, Henry Ford and the advent of mass production, market competition during the 1920s, the development of roads and accompanying highway culture, the effects of the Great

Depression and World War II the automotive Golden Age of the 1950s oil crises and the turbulent 1970s the decline and then resurgence of the Big Three and how American car culture has been represented in film music and literature Updated notes and a select bibliography serve as valuable resources to those interested in automotive history **Crossing Borders**

Kimberly M. Grimes, 1998-07 Defining borders is a complex task especially today as globalization accelerates at an unprecedented rate We have entered a transnational age one in which borders are more porous So says Kimberly M Grimes in *Crossing Borders Changing Social Identities in Southern Mexico* her investigation of migration to the United States from Putla de Guerrero Oaxaca Featuring testimonies of residents and migrants Grimes allows local voices to describe the ways in which Putlecans find themselves negotiating among competing social values The testaments of the Putlecans indicate that the changes occurring in their small town as a result of the circular migration to and from such immigrant enclaves as Atlantic City New Jersey are viewed with mixed emotions Putlecans recognize the financial need to migrate north but they rue the increased consumerism pollution and trash that comes with the rising wealth Men show off by driving their fancy cars with New Jersey tags around the tiny Mexican town but influenced by Anglo culture they also provide greater assistance in child care and housework Women find the sexual and social freedoms of the United States liberating but they still return home to baptize their babies Grimes reminds us however that the Putlecans are not passive recipients of change but are actively embracing it creating it and mediating it By reaching across the border to investigate migration Grimes shows us that social and cultural change are not just the result of national and transnational influences but are also locally negotiated phenomena **Advertising**
