Sex, Men, and Babies William Marsiglio, Sally Hutchinson, 2002-10-27 This accessibly written collaboration between a sociologist and a nursing teacher is a full account of how young men conceptualize fatherhood [Gay Men Pursuing Parenthood through Surrogacy](#) Dean A. Murphy, 2015-07-01 Dean Murphy analyses how relatedness is enacted in the context of gay men pursuing parenthood and a child of one's own through both domestic and transnational surrogacy arrangements Drawing on data collected from in depth interviews with gay men living in Australia and the United States and news media the book explores how gay men enact parenthood and family life in ways that both challenge and reinforce dominant notions of kinship and masculinity These men represent an important first generation to access assisted reproductive technologies for this purpose and are part of an increasing proportion of gay men becoming parents outside a previous heterosexual relationship The findings demonstrate that men come to experience parenthood desire largely because of the new narratives and opportunities being made available to them today *International Encyclopedia of Men and Masculinities* ,

Proposing Prosperity? Jennifer M. Randles, 2016-12-27 Fragile families unmarried parents who struggle emotionally and financially are one of the primary targets of the Healthy Marriage Initiative a federal policy that has funded marriage education programs in nearly every state These programs which encourage marriage by teaching relationship skills are predicated on the hope that married couples can provide a more emotionally and financially stable home for their children Healthy marriage policy promotes a pro marriage culture in which two parent married families are considered the healthiest It also assumes that marriage can be a socioeconomic survival mechanism for low income families and an engine of upward mobility Through interviews with couples and her own observations and participation in marriage education courses Jennifer M Randles challenges these assumptions and critically examines the effects of such classes on participants She takes the reader inside healthy marriage classrooms to reveal how

their curricula are reflections of broader issues of culture gender governance and social inequality In analyzing the implementation of healthy marriage policy Randles questions whether it should target individual behavior or the social and economic context of that behavior The most valuable approach she concludes will not be grounded in notions of middle class marriage culture Instead it will reflect the fundamental premise that love and commitment thrive most within the context of social and economic opportunity
