Wright critically analyzes existing policies and assesses the most effective approaches in preventing sex offender recidivism. This provocative and timely book draws from the fields of criminal justice law, forensic psychology, and social work to examine how current laws and policies are enacted and what to date is known about their efficacy. The team of expert contributors includes Karen Terry, author of *Sexual Offenses and Offenders*, and others who bring a wealth of insight to the field of sex offense. In response to the failed policies of sex offender laws, this book presents alternative models and approaches to sex offense laws and policies. Wright also explores critical cutting edge topics such as internet sexual solicitation, the death penalty, and community responses to sex offense. **Key Features:** An introduction and overview of the history of sex offender laws; Analyzes the role of the media in sex offense and sex offender policies; Examines the political untouchability of sex offender laws and their adverse effects; Features interviews with victims of sexual assault investigating their points of views on what kinds of reforms need to be made to sex offender laws; Thought provoking and insightful. *Sex Offender Laws* serves as a vital resource for policy makers, researchers, and students of criminal justice law and social work. **Sex Offenders**

Arjan A. J. Blokland, Patrick Lussier, 2015-09-08. An authoritative and in depth treatment of the latest research into the criminal careers of sex offenders, providing background and investigating the policies used to combat one of society's most intractable public issues. **Features:** chapters based on original research from the most prominent scholars in the field of sex offender and criminal career research; Deals with the entire criminal careers of sex offenders from youth to adulthood; Illustrates the significance of the criminal career approach for theory, treatment, research, and policy regarding sex offenders; Covers a wider breadth of topics than existing texts and uses data from various studies and countries including the U.S., Canada, the U.K., and the Netherlands; Features an introductory chapter charting the origins of the criminal career perspective as well as the history of sex offender research, pinpointing the most important research questions and current debates in both fields. **No Easy Answers** Sarah Tofte, Human Rights Watch (Organization), 2007. *No Easy Answers* is the first comprehensive study of US sex offender registration, community notification, and residency restriction laws, their public safety impact, and the effect they have on former offenders and their families. It concludes the laws are poorly crafted and misguided, failing to protect children from sex crimes but making it nearly impossible for former offenders to rebuild their lives. In many states, everyone convicted of a sex crime must register, and the requirement can last for life. The requirements are overbroad in scope and overlong in duration. As a result, there are more than 600,000 registered sex offenders, including individuals convicted of sexual sex between teenagers, prostitution, and public urination, as well as those who committed their only offenses decades ago. Unfettered public access to online sex offender registries exposes registrants to harassment, ostracism, and even violence, with little evidence that this form of community notification protects anyone from sexual violence. Residency restrictions prohibit former offenders from living within a designated distance, anywhere from 500 to 2,500 feet from places where children gather. The restrictions have the effect of banishing former offenders from entire towns, forcing

them to live far from home families jobs and treatment and hindering law enforcement supervision The restrictions may have no impact on the likelihood of recidivism Sex offender laws reflect public concern that children are at grave risk of sexual abuse by strangers who are repeat offenders The real risks children face are quite different statistics demonstrate that most sexual abuse of children is committed by family members or persons known and often trusted by the victim and by someone who has not previously been convicted of a sex offense The laws also reflect the widely shared but erroneous belief that sex offenders continually repeat their offenses Authoritative studies however indicate that three out of four adult offenders do not reoffend

Managing Sex Offender Risk Ms Hazel Kemshall, Gill McIvor, 2004-09-15 Based on key research into assessment treatment and recidivism this book offers practical guidance on improving intervention techniques with sex offenders The contributors explore the monitoring and surveillance strategies and cognitive behavioural techniques currently in use and give clear directions for future practice
